Practical

Information Technology

Class - X

Session : 2026-27

PM Shri JNV
Tarikhet Almora

Name: _____

CBSE Roll: _____

Section: _____

Sign Internal Examiner	**Sign Principal**

Certificate

This is to certify that

Student Name_____

CBSE Roll Number_____

has successfully completed the practical assignments in the subject of Information Technology for Class 10. The practical file submitted by the student is a comprehensive compilation of the practical exercises and projects undertaken during the academic session **2026-27**.

The student has demonstrated proficiency in various IT concepts and practical applications, including but not limited to Libre Office (Write, Calc, Base).

The practical file has been assessed and found to be satisfactory, reflecting the student's understanding and application of Information Technology concepts. The student has exhibited diligence, creativity, and a keen interest in the subject.

This certificate is awarded as a testimony to the student's successful completion of the practical component of the Information Technology course for Class 10.

Pankaj Bhilingwal

12	Retrieve data using query		
13	Query using criterion and sorting		
14	Creating form using wizard		
15	Creating report using wizard		

Unit 1: Digital Documentation (Advanced)

Learning Outcome - Create and apply styles in digital document

Assignment 1

Objective: Using various commands to create customer styles and apply predefined styles in LibreOffice Writer.

Task: Type a paragraph with at least 100 words and create below given styles as instructed:

1. **Title**
    a. Font Name: Kristen ITC, Size:28, Colour: Magenta
    b. Give Style Name: Title AI (Use create styles using drag and drop)
2. **Headings**
    a. Font name: Times New Roman, Size: 24 , Colour: Red.
    b. Give the style name: My Heading (Use create style from selection command)
3. **Paragraph and Headings -** My heading styles to all headings using Fill Format
4. **Load Styles** in New Document and Save the document

Solution:

Preparing document

1. Click on **Start > All Apps > LibreOffice 24.2 > LibreOffice Writer.**
2. Type required text.

Creating styles

Title (Using Drag and Drop)

1. Select the title “Generative Artificial Intelligence”.
2. Apply the desired formatting.
3. Now click on **Styles > Manage Styles** option.
4. Select the title “Generative Artificial Intelligence” and darg over the Styles pane present on the screen.
5. New Style From Selection dialog box will appear with a prompt to enter New Style Name. Type name as “Title AI”.
6. Click on OK button.

Headings (Create Style using New Style from Selection option)

1. Select first heading – "Introduction".
2. Apply the desired formatting for style as per instructions given in the question.
3. Click on Styles > Manage Styles option. A styles pane will appear.
4. Click on Style Actions button and choose New Style From Selection option.
5. New Style from Selection dialog box appears. Type Style name as – "My Heading".
6. Click on OK.

Applying Styles

➢ **Using double click**

1. Select the heading "Technology".
2. Now Find the newly created styles "My Heading".
3. Double Click on it.

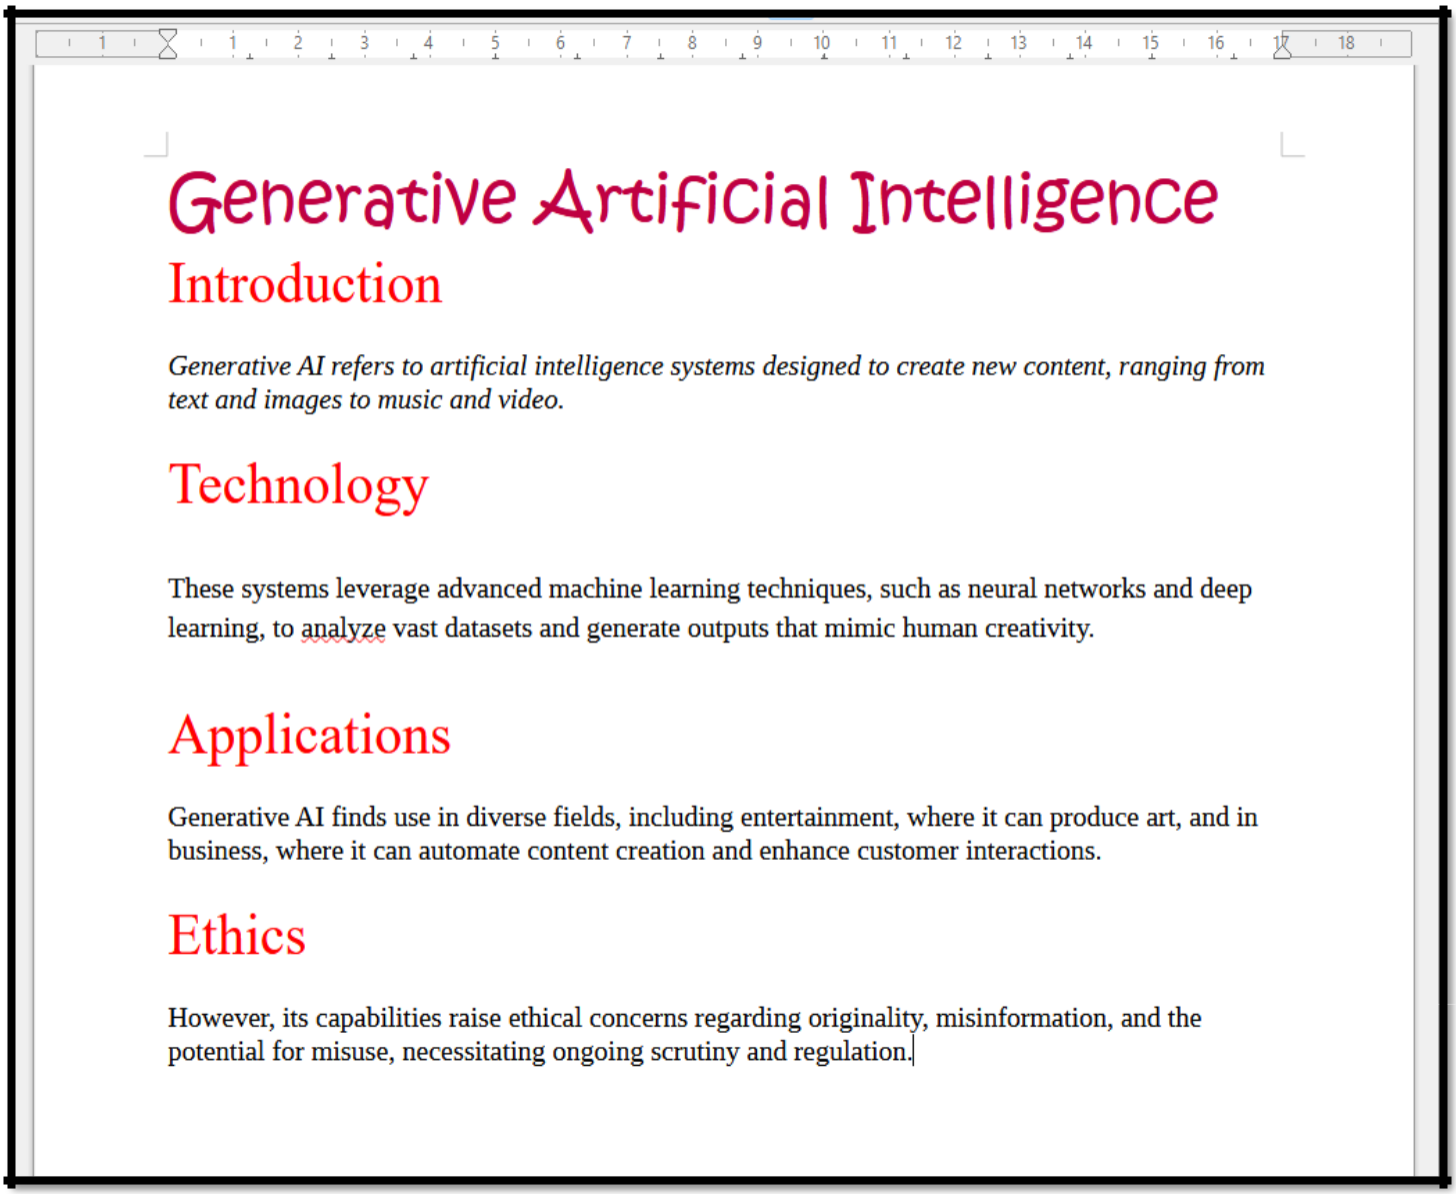

➢ **Using Fill Format**

1. Click on Fill Format icon on Styles pane.
2. A fill format mode will be activated and mouse cursor changes to Fill Format mode icon.
3. Select "My Heading" style from Styles pane.
4. Drag it over to the headings to apply "My Heading" style.
5. Save the file as "Practical 1 – Create and apply styles".

Load styles

1. Open new blank document.
2. Activate Styles pane from side bar or any other option.
3. Click on Style Actions button and choose "Load Styles from Template".
4. Find the button From File and click on it.
5. Choose the previously saved file.
6. Click on Open button.
7. The styles from selected document will be added into the Style gallery.
8. Save the file.

Output Document:

Generative Artificial Intelligence

Introduction

Generative AI refers to artificial intelligence systems designed to create new content, ranging from text and images to music and video.

Technology

These systems leverage advanced machine learning techniques, such as neural networks and deep learning, to analyze vast datasets and generate outputs that mimic human creativity.

Applications

Generative AI finds use in diverse fields, including entertainment, where it can produce art, and in business, where it can automate content creation and enhance customer interactions.

Ethics

However, its capabilities raise ethical concerns regarding originality, misinformation, and the potential for misuse, necessitating ongoing scrutiny and regulation.

Learning Outcome – Working with Images in digital document

Assignment 2

Objective: Inserting images and shapes and rearranging them

Task: Create a new document in LibreOffice prepare an advertisement using various shapes and images.

Solution:

Add Page background

1. Open LibreOffice Writer and Background from **Format > Page Style > Area > Gradient**.
2. Choose **Sundown** gradient for page background and Click on **Apply** and **OK**.

Add Page border

1. Click on **Format > Page Style > Borders**.
2. Click on **All four borders** option.
3. Choose the line style from Style.
4. Click on **Apply** and **OK** button.

Add font work (Learn Coding)

1. Click on View > Toolbar > Drawing.
2. Click on Insert Font Text icon from the Drawing Toolbar.
3. Select Gold Wave style.
4. Type the text Learn Coding and change color.
5. Press enter when you finished.

Add font work (For 3 to 12 Class Students)

1. Click on Insert Font Text icon from the Drawing Toolbar.
2. Select relevant style for Font Text.
3. Type the desired text and change the color.
4. Press enter when you finished.

Insert Image

1. Place the cursor where image is required.
2. Click Insert > Image option. An Insert Image dialog box will appear.
3. Select the image from the dialog box.
4. Click on open button.

Applying border to image

1. Select an image to apply border.
2. Click on Borders icon on the Image toolbar and select Outer Border (Only).

Add Textbox to insert courses

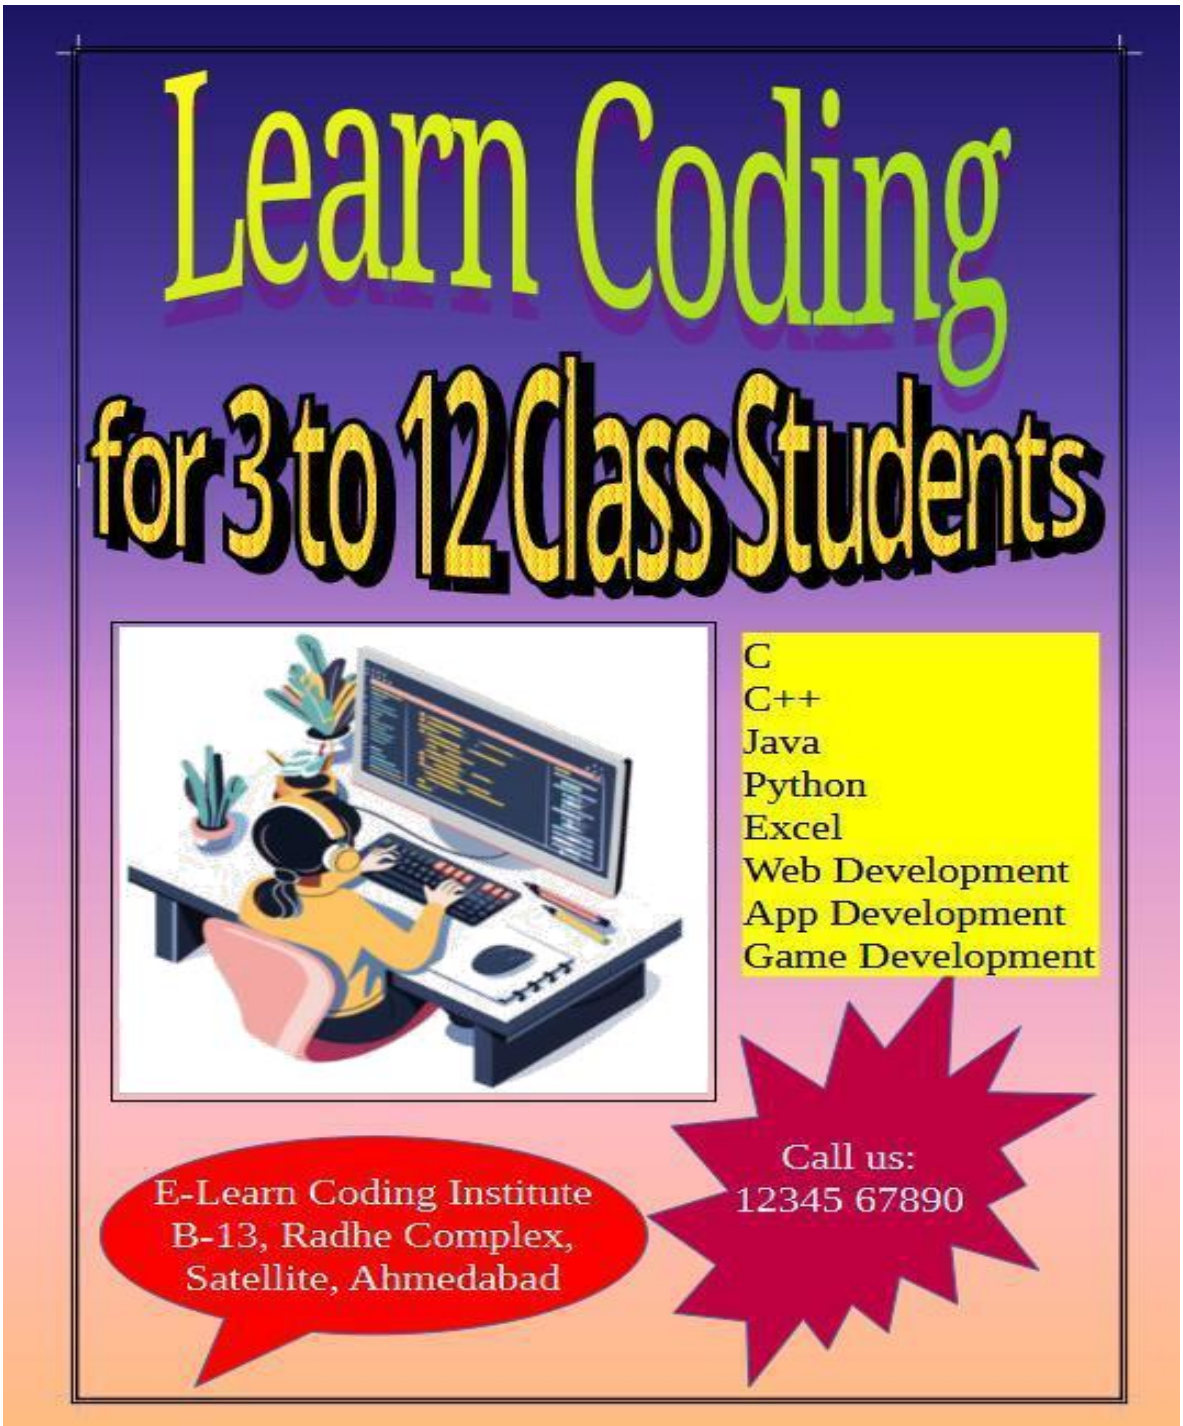

1. Select rectangle box from Drawing toolbar.
2. Draw the rectangle in the document.

Applying background colour to box

1. Select the box.
2. Choose the Fill Colour icon from drawing properties toolbar.
3. Select Yellow color from the Fill Colour icon.
4. Add the desired text.

Similarly add remaining shapes, apply the desired formatting and text. Save the file.

Output:

Learning Outcome - Create and use template

Assignment 3

Objective: Creating templates in LibreOffice Writer and saving for distribution.

Task:

- Prepare a template for the class time table.
- Apply formatting as required.
- Set this template as a default template.
- Reset the default template as usual.

Solution:

1. Create a new document in LibreOffice Writer.
2. Click on **Format > Page Style** option**.**
3. A page style dialog box will appear.
4. **Select Area > Image > Add/Import** option.
5. Apply desired options for background and click on OK button.
6. Insert table for time table and format it as per your choice.

Saving file as template

1. Click on **File > Templates > Save as Template** option.
2. A **Save As Template** dialog box will appear.
3. "Time Table " as Template Name in **Enter Template Name** dialog box.
4. Select Template Category as **MyTemplate**.
5. Click on **Set as default template** option.
6. Click on **Save** button.

Reset default template

1. Click on **File > Templates > Manage Templates** option.
2. A manage template dialog box will appear.
3. Click on **Manage > Reset Default Text Document** option.
4. Click on Close button.

Output

Learning Outcome – Create Table of Contents

Assignment 4

Objective: Create and Customize Table of Contents

Task: Prepare a document with different headings and apply a table of contents to it.

Solution:

1. Type the contents.
2. Apply appropriate level of headings from the Styles window.
3. Place the cursor at the beginning of document to insert Table of Content.
4. Click on Insert → Table of contents and index → Table of contents, index or Bibliography option. The Table of contents, index or Bibliography will appear.
5. Select and apply the styles for the Table of Contents.

3. Click on OK.

Output

Table of Contents

Artificial Intelligence....1
Introduction....1
Domains of AI....2
Data Science....2
Computer Vision....3
Natural Language Processing....3
AI Project Cycle....4
Steps of AI Project Cycle....4

Learning Outcome – Customize Table of contents

Assignment 5

Objective: Customize the table of contents

Task: Apply customization following customization on above Table of contents:

1. Apply heading levels up to 3
2. Divide Table of contents into two parts vertically
3. Add a background colour of your choice

Solution:

1. Select the Table of Contents created in previous question.
2. Select **Type** tab.
3. Find the option **include level upto** and select 3.
4. Click on **Columns** tab.
5. Set 2 in the **Columns**.
6. Click on Background tab.
7. Click on **Colour** button.
8. Pick the desired colour to apply as background.
9. Click on **OK** button.

Output:

Table of Contents

Artificial Intelligence.....2
Introduction.....3
Domains of AI.....4
Data Science.....5
Computer Vision.....6
Natural Language Processing.....7
AI project Cycle.....8
Steps of AI Project Cycle.....9

Unit 2: Electronic Spreadsheet (Advanced)

Learning Outcome Consolidating Data

Assignment 1

Objective: Applying Data Consolidation in LibreOffice Calc

Task: Prepare 3 worksheets for products sales and consolidate them

Solution:

Preparing sheets for Data Consolidation

1. Create a new file in spreadsheet software and enter data for 5 products.
2. Add two worksheets in the file and modify the data for all. Click on Sheet tab and + icon there,
3. Rename all worksheets like sheet1 - **Ahmedabad**, sheet2 - **Surat** and sheet3 - **Rajkot**. Select the sheets respectively and do right click on **Sheet tab > Rename Sheet** option, Type the sheet name and Click on **OK** button.
4. Now add one more worksheet at the end and rename as Consolidated as similar as step 2 and 3

Perform Data Consolidation

1. Place the cursor in cell **B2** in **Consolidated** sheet.
2. Click on **Data > Consolidate** option.
3. The Consolidate dialog box will appear.
4. Choose the **Sum** function.
5. Select **Data Source ranges** respectively and click on **Add** button.
6. Click on OK button.

Output:

Sheet2 - Surat

S. No	Product	Sales
1	Pen	120
2	Pencil	140a
3	Eraser	180a
4	Sketch Pen	120(
5	Water Colours	140)

S. No	Product	Sales
1	Pen	130
2	Pencil	160
3	Eraser	210
4)	Sketch Pen	180
5	Water Colours	220

Sheet4-Consolidated Skeet

S. No	Product	Sales
1	Pen	350
2	Pencil t	450
3	Eraser	590
4	Sketch Pen t	700
5	Water Colours	460

Learning Outcome Subtotal

Assignment 2

Objective: Applying subtotal in LibreOffice Calc

Task: Prepare a worksheet as following

	A	B	C	D
1	**Project Name**	**Task Name**	**Assigned to**	**Days Required**
2	Marketing	Market Research	Alice	13
3	Marketing	Content Creation	Bob	14
4	Marketing	Social Media Planning	Charlie	22
5	Marketing	Campaign Analysis	Daisy	25
6	Product Dev	Prototype Development	Ethan	18
7	Product Dev	Quality Assurance	Fiona	10
8	Development	User Interface Design	Gabriel	25
9	Customer Svc	Service Improvement	Hannah	22
10	Customer Svc	Ticket Resolution	Ian	25
11	Customer Svc	Customer Feedback	Julia	30
12	Financial	Budget Analysis	Kevin	22
13	Research	Financial Reporting	Mark	21
14	Financial	Investment Planning	Mark	25
15	Development	Market Trends Analysis	Nathan	23
16	Research	Data Collection	Olivia	32
17	Research	Research Paper Writing	Peter	27

Apply subtotal and find the sum of days required for project

Solution:

1. Open spreadsheet software and enter the data.
2. Select the data.
3. Click on **Data → Subtotal.** The Subtotal dialog box appears.
4. Select column **Project Name** in Group By option.
5. Now mark the column to Days Required to count the no. of days required for each project.
6. Select the sum function sum from Use Function option.
7. Click on OK button.

Output:

	A	B	C	D
1	Project Name	Task Name	Assigned to	Days Required
5	***Customer Svc Sum***			***77***
6	Development	User Interface Design	Gabriel	25
7	Development	Market Trends Analysis	Nathan	23
8	***Development Sum***			***48***
9	Financial	Budget Analysis	Kevin	22
10	Financial	Investment Planning	Mark	25
11	***Financial Sum***			***47***
12	Marketing	Market Research	Alice	13
13	Marketing	Content Creation	Bob	14
14	Marketing	Social Media Planning	Charlie	22
15	Marketing	Campaign Analysis	Daisy	25
16	***Marketing Sum***			***74***
17	Product Dev	Prototype Development	Ethan	18
18	Product Dev	Quality Assurance	Fiona	10
19	***Product Dev Sum***			***28***
20	Research	Financial Reporting	Mark	21
21	Research	Data Collection	Olivia	32
22	Research	Research Paper Writing	Peter	27
23	***Research Sum***			***80***
24	***Grand Sum***			***354***
25				

Learning Outcome – Creating cell referencing in Spreadsheet

Assignment 3

Objective: Link data and Spreadsheet

Task: Prepare a worksheets as following:

1. Enter the data such as Roll no, GR NO, First Name, Last Name, Date of Birth, Father Name, Mother Name. Enter records for at least 10 students.

2. Rename this worksheet as "Student Profile".

3. Insert 3 new worksheets and rename as "**PT2**", "**PT2**" and "**PT3**" respectively.

4. In the **PT1** worksheet create a reference for Roll No, First Name, and Last Name columns from Student Profile by using the keyboard.

5. In the **PT2** worksheet create a reference for Roll No, First Name, and Last Name columns from Student Profile by using the mouse.

6. In the **PT3** worksheet create a reference for Roll No, First Name, and Last Name columns from Student Profile as you wish.

Solution:

1. Open Excel and create a new workbook.
2. In the first worksheet, enter the data.
3. Right-click on the sheet tab (usually named “Sheet1”).
4. Select “Rename” and change the name to “Student Profile”.
5. Insert three new worksheets by clicking the “+” icon at the bottom.
6. Rename them to **“PT1”, “PT2”,** and **“PT3”** respectively.
7. Go to the **“PT1”** worksheet.
8. In cell A1, type =Student Profile!A1 to reference the Roll No from the “Student Profile” sheet.
9. Drag the fill handle to copy the formula down for all 10 students.
10. Repeat the process for First Name and Last Name columns.
11. Go to the **“PT2”** worksheet.
12. Click on cell A1, type =, then navigate to the “Student Profile” sheet and click on cell A1.

13. Press Enter to create the reference.
14. Drag the fill handle to copy the formula down for all 10 students.
15. Repeat the process for First Name and Last Name columns.
16. Go to the **"PT3"** worksheet.
17. You can use either the keyboard or mouse method to create references for Roll No, First Name, and Last Name columns from the "Student Profile" sheet.

Output:

Student Profile

Roll No	GR NO	First Name	Last Name	Date of Birth	Father Name	Mother Name
1	1001	Aarya	Sharma	01/01/2010	Rajesh	Sunita
2	1002	Bhavesh	Patel	02/02/2010	Kiran	Meena
3	1003	Charu	Mehta	03/03/2010	Anil	Rekha
4	1004	Dev	Joshi	04/04/2010	Suresh	Anita
5	1005	Esha	Desai	05/05/2010	Ramesh	Lata
6	1006	Farhan	Khan	06/06/2010	Imran	Ayesha
7	1007	Gauri	Shah	07/07/2010	Mahesh	Pooja
8	1008	Harsh	Trivedi	08/08/2010	Naresh	Kavita
9	1009	Isha	Bhatt	09/09/2010	Prakash	Nisha
10	1010	Jai	Patel	10/10/2010	Mukesh	Seema

PT 1, PT 2, PT 3

Roll No	First Name	Last Name
1	Aarya	Sharma
2	Bhavesh	Patel
3	Charu	Mehta
4	Dev	Joshi
5	Esha	Desai
6	Farhan	Khan
7	Gauri	Shah
8	Harsh	Trivedi
9	Isha	Bhatt
10	Jai	Patel

-

Learning Outcome – Hyperlink in Spreadsheet

Assignment 4

Task:

1. Insert hyperlink from the internet.
2. Insert hyperlink email.
3. Insert hyperlink of existing file.
4. Insert hyperlink of new file.

Insert Hyperlink from the internet

1. Type the text – **NCERT Solution IT Class 10**.
2. Click on **Insert > Hyperlink** option**.** Hyperlink dialog box will open.
3. Click on **Internet** and type the URL.
4. Set the behaviour of link by selecting frame and target.
5. Click on OK button.

Insert Hyperlink Email

1. Type the text – Gmail in the cell.
2. Click on **Insert > Hyperlink** option.
3. Select **Mail** option.
4. Type the recipient mail id in **Recipient** box.
5. Type Subject in **Subject** box.
6. Set the behaviour of link by selecting **Frame**, **Target** and **Name**.
7. Click on Apply and OK button.

Insert hyperlink of existing file

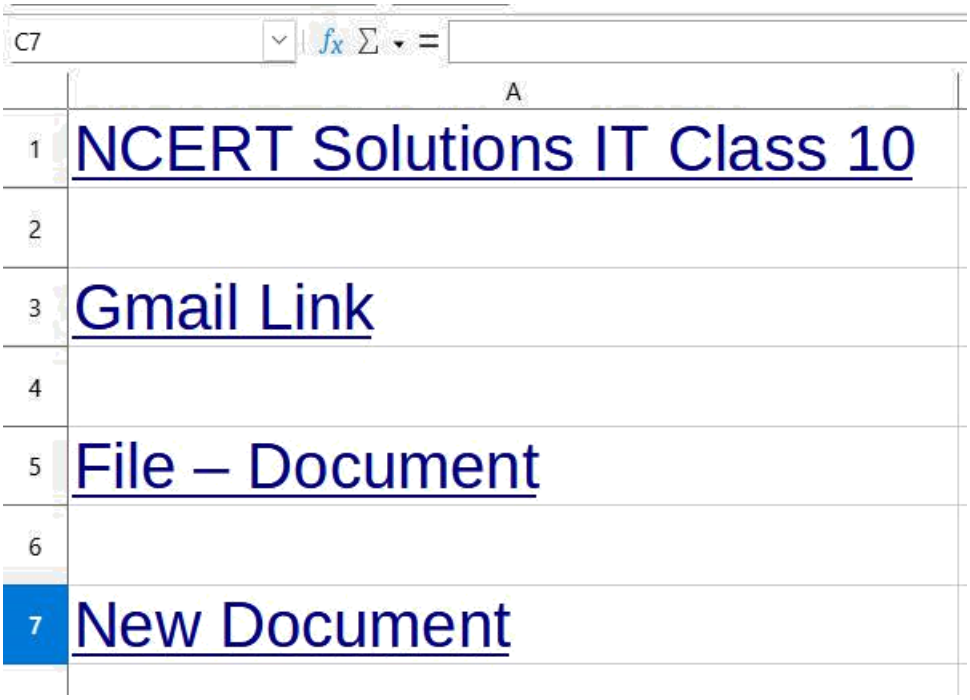

1. Type the text: File – Document
2. Click on **Insert > Hyperlink** option.
3. Choose **Document** button.
4. Select the file from **Path** option. Either type the path or select the file using browse button.
5. Set target of link.
6. Apply settings required such as Frame, Name and Text.

7. Click on **Apply** and **OK** button.

Inserting Hyperlink of New Document

1. Type the Text – New Document.
2. Select option as **Edit Now**.
3. Type Filename in **File** box.
4. Select **File Type** as **Text Document**.
5. Apply settings such as Frame, Name etc.
6. Click **Apply** and **OK** button.

Output:

Learning Outcome – Goal Seek

Assignment 5

Objective: Goal seek Application

Task: Enter data to obtain total net profit and set the goal to achieve total net profit of ₹ 23,000 by changing the August month gross profit.

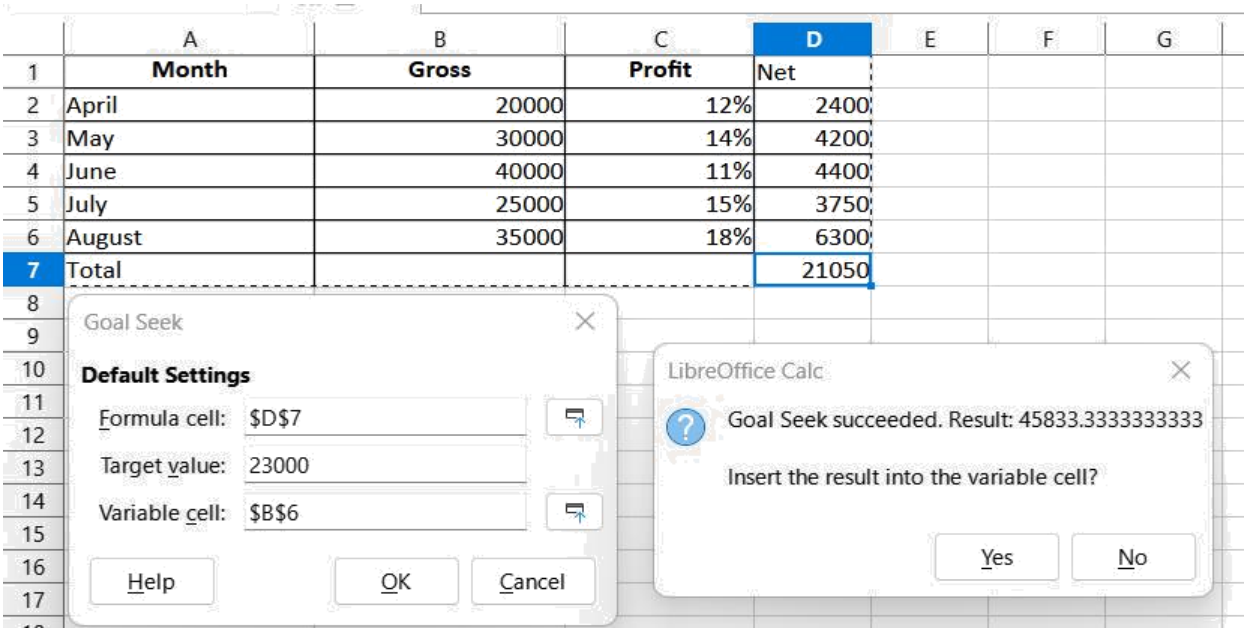

Sample Data:

Month	Gross	Profit	Net
April	20000	12%	2400
May	30000	14%	4200
June	40000	11%	4400
July	25000	15%	3750
August	35000	18%	6300
Total			21050

Solution:

1. Enter data and prepare the spreadsheet along with formula.
2. Place the cursor in D7 cell.
3. Click on **Tools > Goal Seek** option. The Goal Seek dialog box will appear.
4. Move the cursor in Target Value box and enter the value – 23000.
5. Now select the cell as a variable cell.
6. Click on OK.
7. It will display the value obtained by Goal seek. If you wish to insert it in the spreadsheet click on Yes, otherwise No.

Output:

Unit 3
Database Management System

Learning Outcome – Create and edit tables using wizard

Assignment 1

Objective: Steps to create a table using table wizard

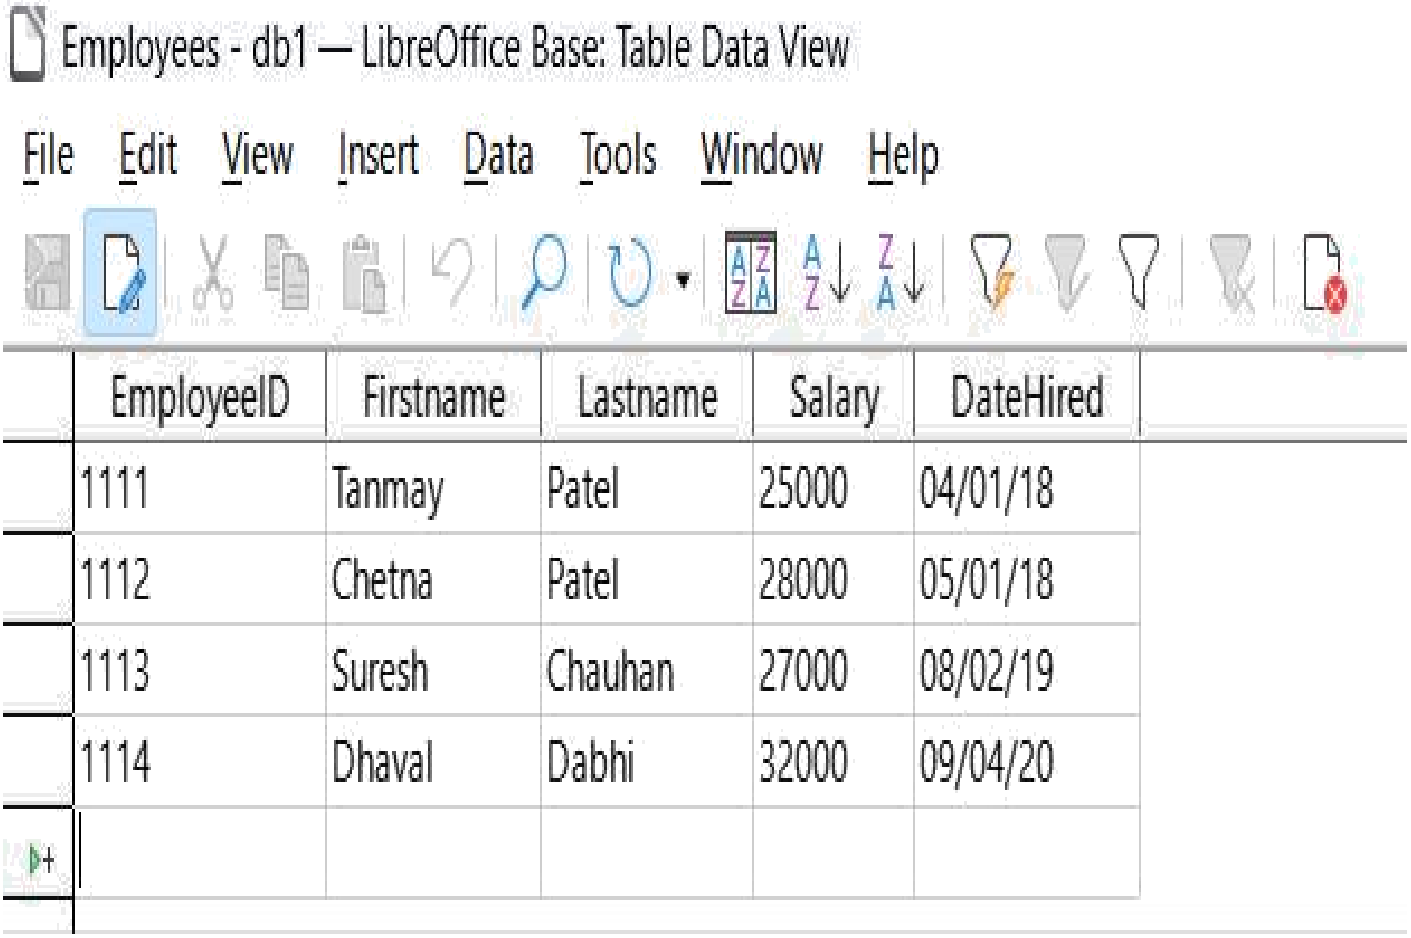

Task: Create a table using wizard and insert data.

Solution:

1. Click on Start → All Programs → LibreOffice 24.2 → LibreOffice Base. 24.2
   LibreOffice Base window will open with Database Wizard.
2. Click on **Create a new database** option.
3. Click on **Next** button.
4. Select the database Register option either **Yes**, or **No**.
5. Check on **Open database for editing**.
6. Click on **Finish** button.
7. It will prompt to save the database.
8. Type the desired name and save it. I have given db1.
9. Now click on **Tables** button from Left pane and choose the option - **Use Wizard to Create Table…** from the tasks window.
10. The Table Wizard will open. Follow wizard steps to create a table.
11. In first step of wizard select the Category either Business or Personal,
12. Now choose a table from list of table. As I have selected Employees table.
13. Click on Next and select field types and all if you want to change it. Click on Next. I have selected EmployeeID, Firstname, Lastname, Salary, Datehired.
14. Set a primary key for your table in this step. Click on Use an existing field as a Primary Key. I have selected EmplyeeID as Primary key. Click on Next.
15. If you wish to change the table name then type new name for the table and click on Insert.

Data immediately, and click on Finish.

16. Enter data now.

EmployeeID	Firstname	Lastname	Salary	DateHired
1111	Tanmay	Patel	25000	04/01/18
1112	Chetna	Patel	28000	05/01/18
1113	Suresh	Chauhan	27000	08/02/19
1114	Dhaval	Dabhi	32000	09/04/20

Learning Outcome – Retrieve data using query

Assignment 2

Objective: Query creation using wizard

Task: Create table Marksheet (Using SQL Command) and perform the bellow given queries using wizard and design view.

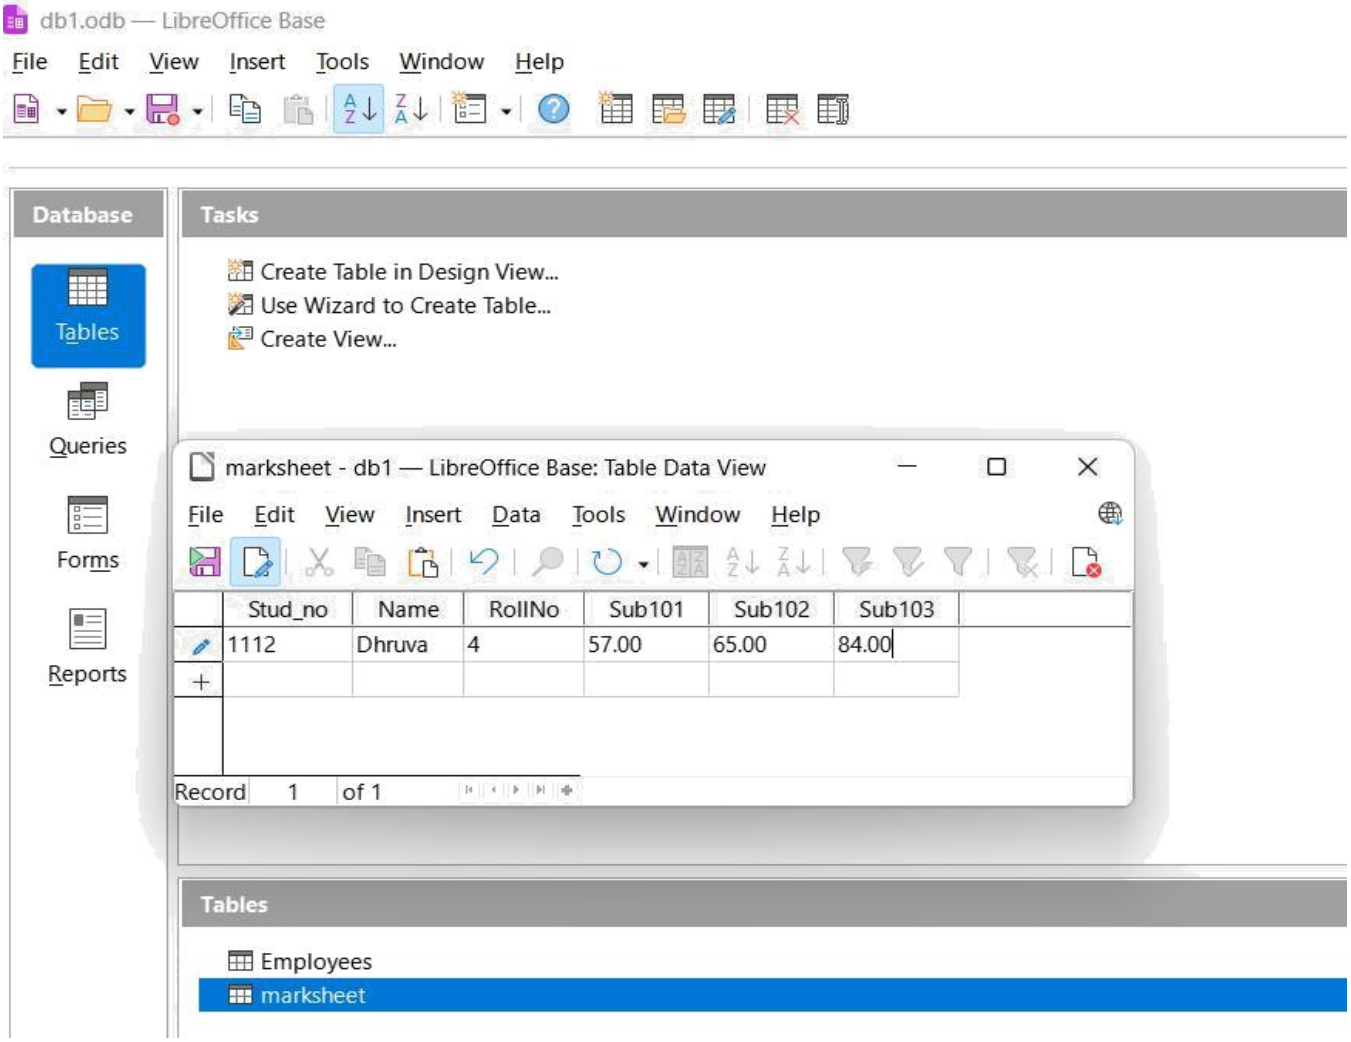

Field Name	Data Type	Size
Stud_No	Integer	2
Name	Text	15
RollNo	Integer	3
Sub101	Decimal	3,2
Sub102	Decimal	3,2
Sub103	Decimal	3,2

1. In the Database file Add these Fields: (Total: Datatype- Number 3 digits, Percentage: Datatype - Number 3 digits with 2 decimal places, Grade: Datatype- Char with 2 letters)
2. Insert more 3 records in MARKSHEET using SQL mode.
3. Display name, rollno, marks of 3 subjects, total and percentage using design view.
4. Display name, rollno, grades from the marksheet table using query wizard.
5. Display the maximum marks for Sub101 and minimum marks for Sub102 using design view.
6. Display the rollno, name and percentage whose percentage are more than 70 using design view.
7. Display all the record in ascending order of names using design view.

Solution:

```
create table “marksheet”
(“Stud_no” tinyint primary key,
“Name” varchar(15),
“RollNo” tinyint,
“Sub101” decimal(5,2),
“Sub102” decimal(5,2),
“Sub103” decimal(5,2)) ;
```

Output:

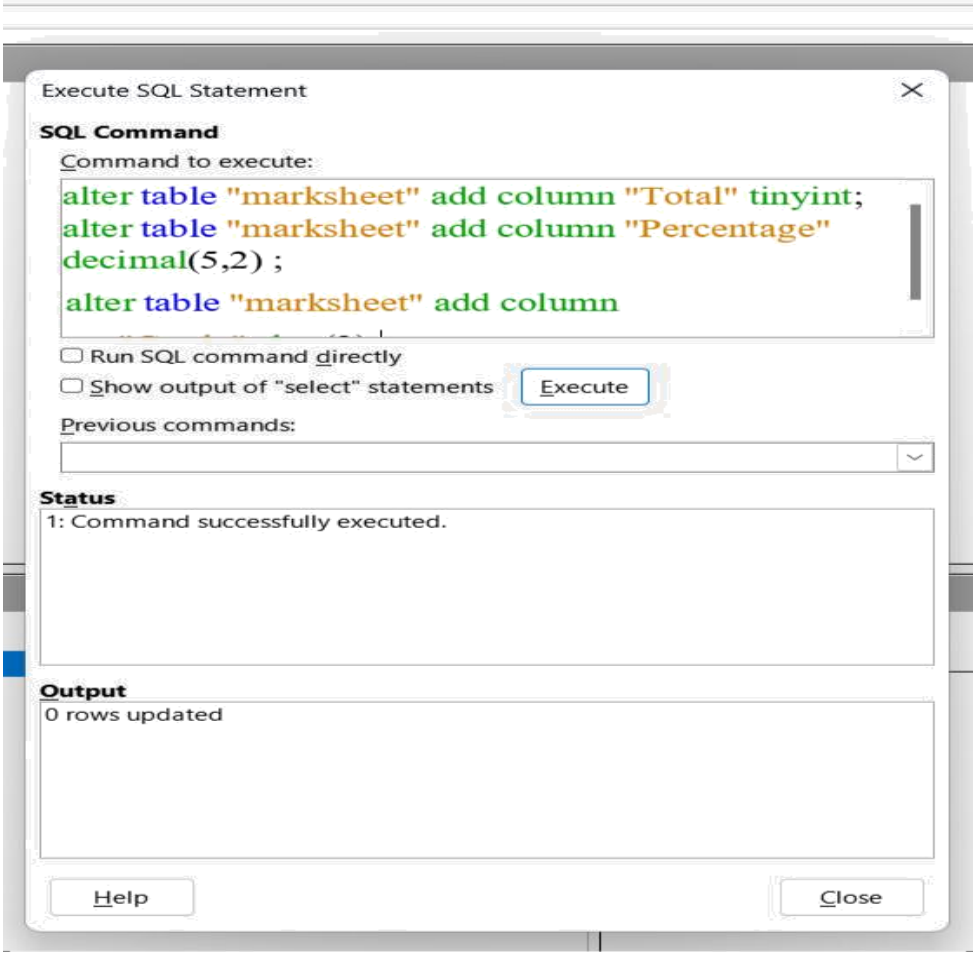

Queries

Add Columns

1. Click on Tools → SQL option.
2. Add column Total → alter table "marksheet" add column "Total" tinyint
3. Add column Percentage → alter table "marksheet" add column "Percentage" decimal(5,2)
4. Add column grade → alter table "marksheet" add column "Grade" char(2)
5. Click on Execute button.
6. Click on Close button.

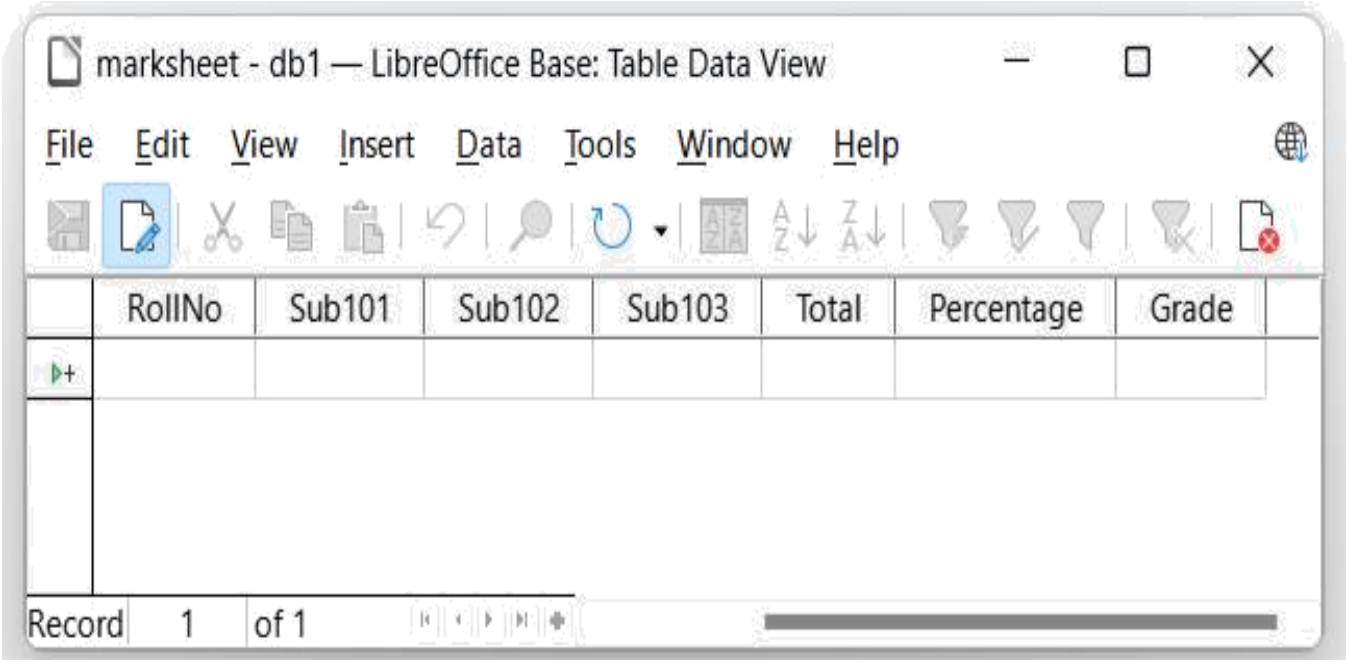

Output:

Command

Screen

Table Preview

Insert records

1. Click on Tools > SQL option.
2. insert into "marksheet" values (101, 'Sagar', 105, 27, 25, 28, 80 , 88 , 'B1')
3. Click on Execute button.
4. Close the window.
5. Click on View > Refresh Tables option to update data into the table.

Output:

SQL Command:

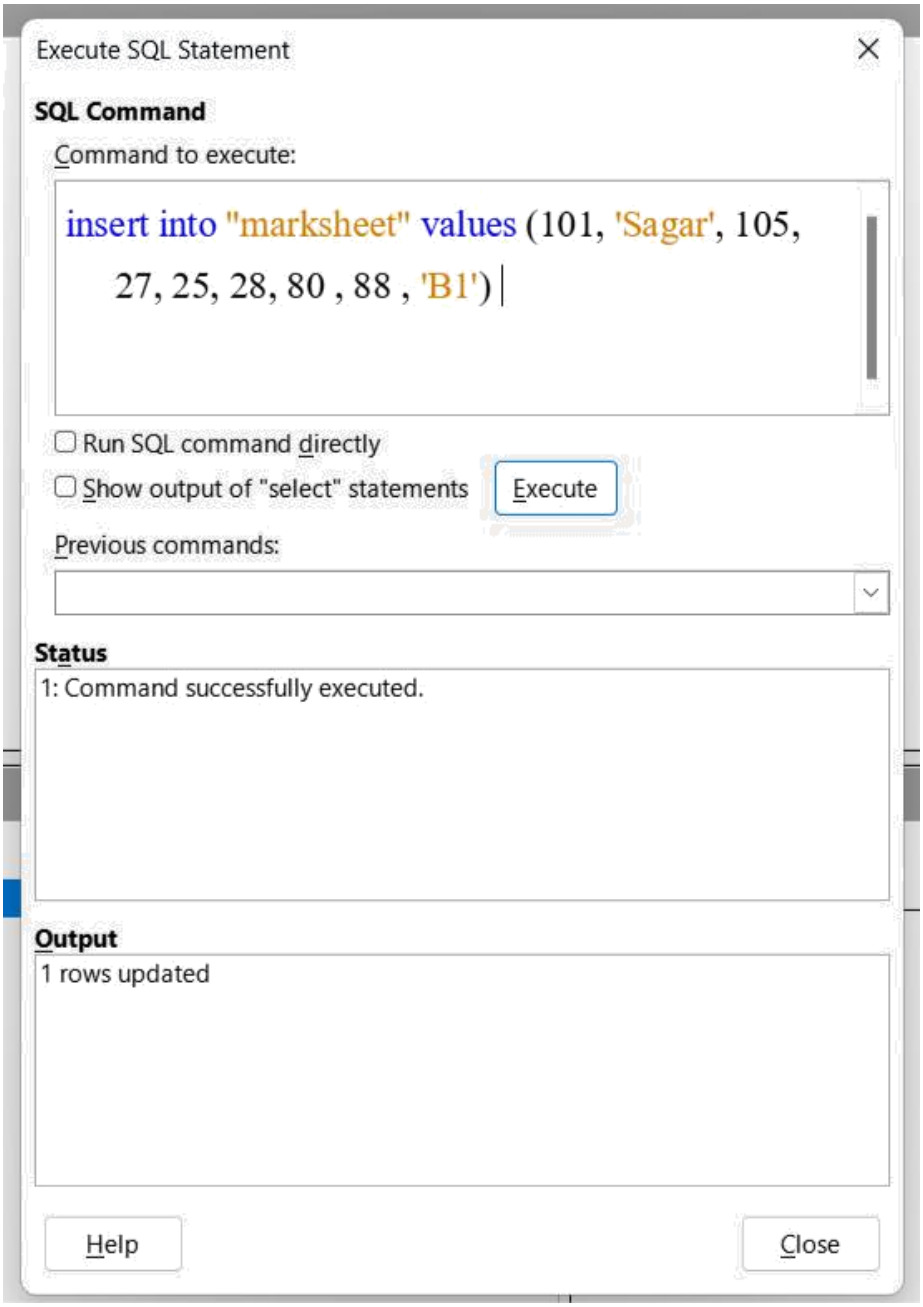

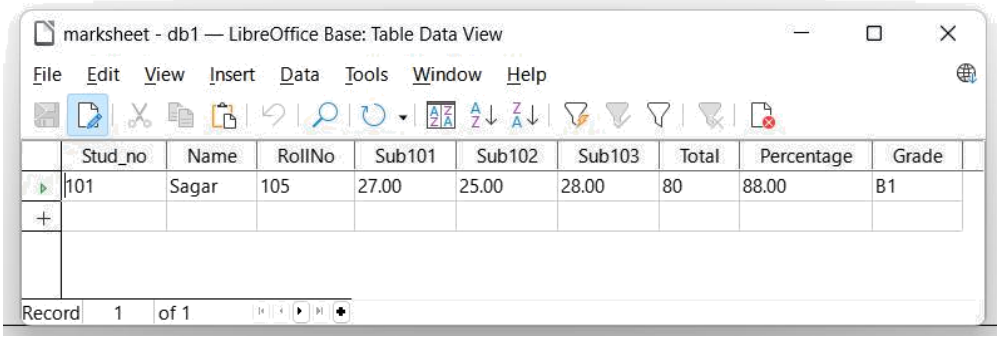

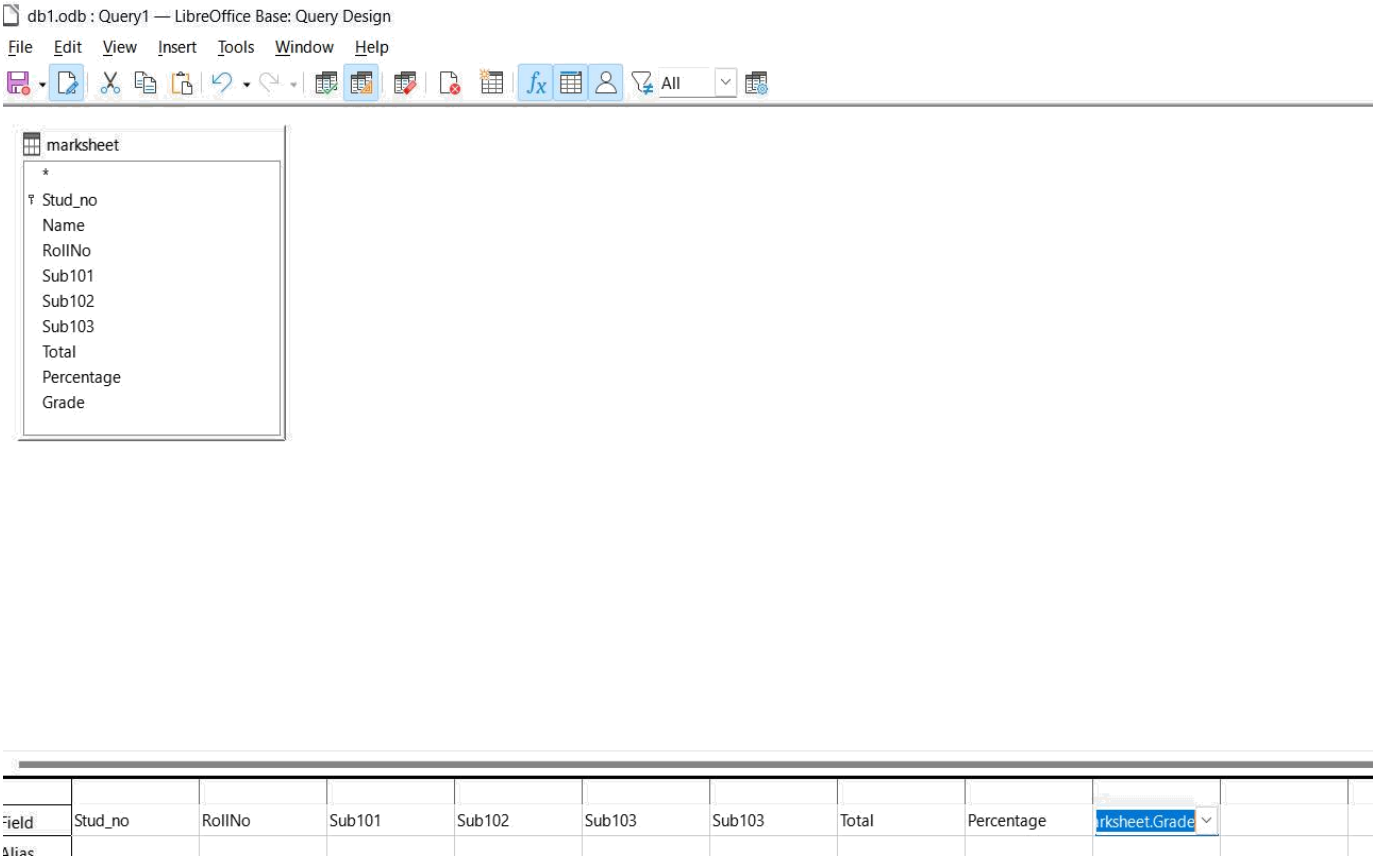

Table Preview:

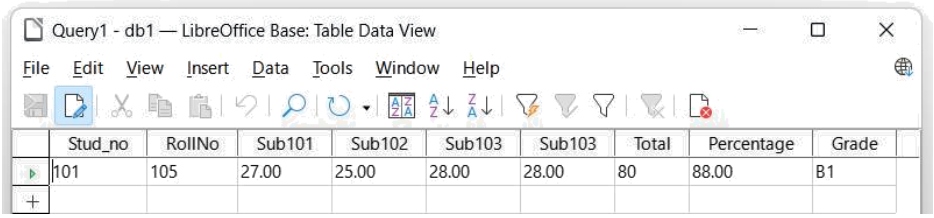

Steps to perform a query using design view

1. Click Queries → Create Query in Design View….
2. The query design window will open.
3. Select the marksheet table and click on Add button.
4. Now select fields given in the question like name, rollno, marks,Sub101, Sub102, Sub103, Total and Percentage.
5. Save the query.

Output:

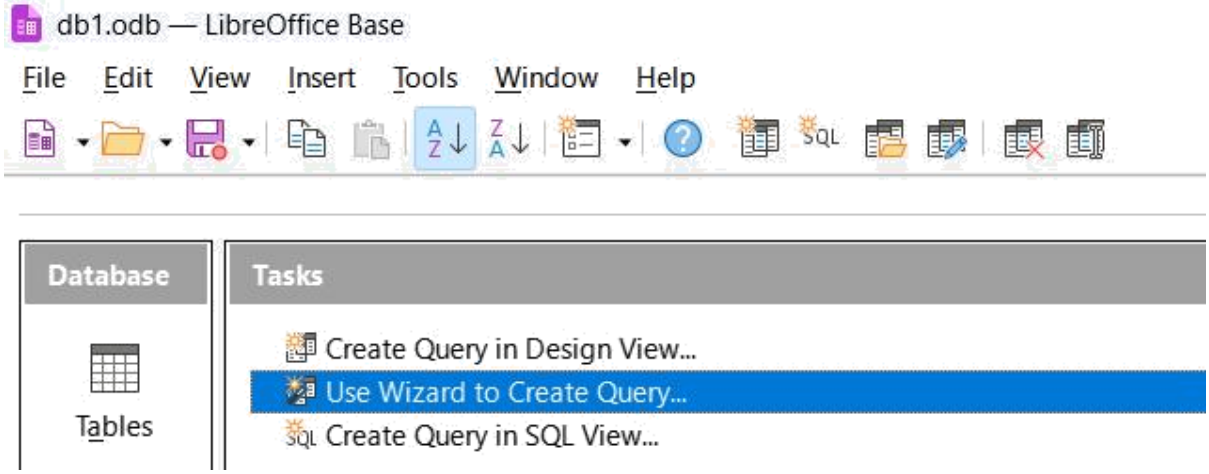

Query Result:

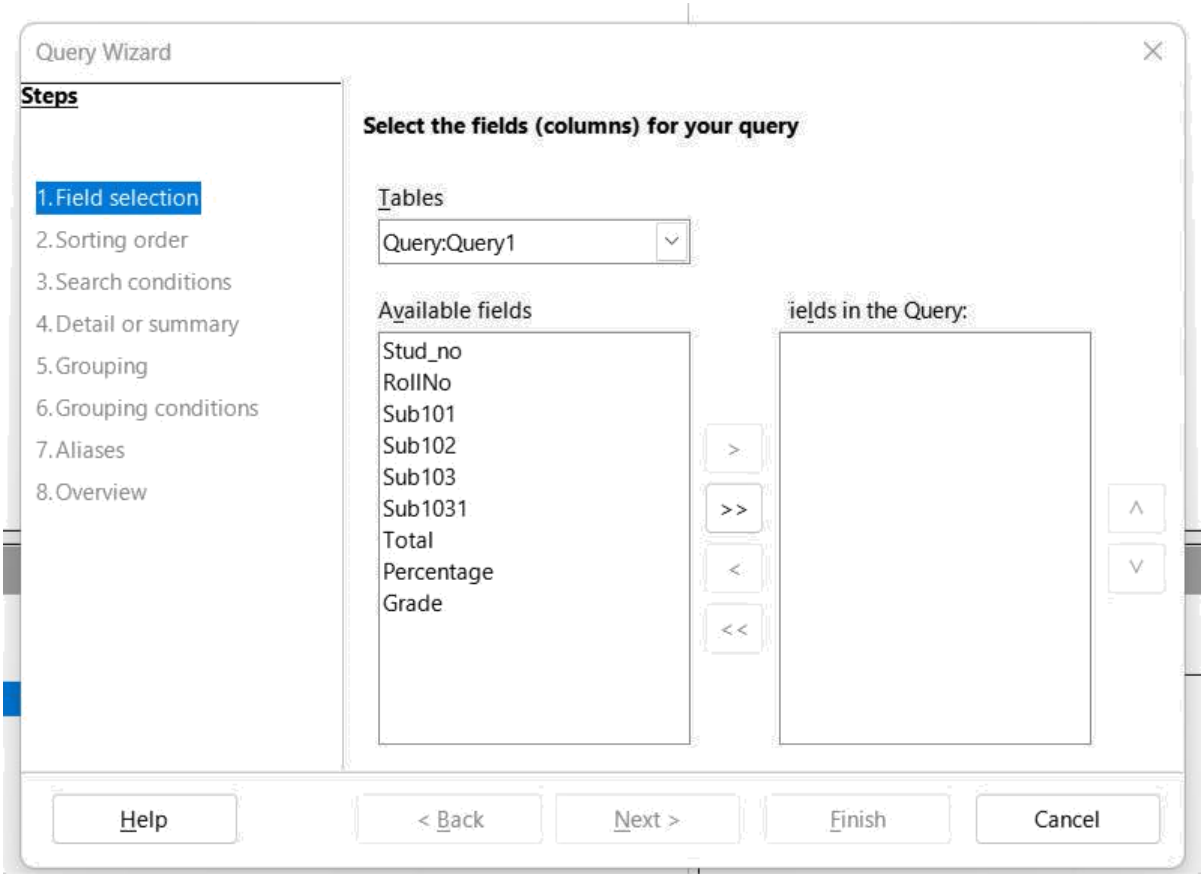

Stud_no	RollNo	Sub101	Sub102	Sub103	Sub103	Total	Percentage	Grade
101	105	27.00	25.00	28.00	28.00	80	88.00	B1

Query Wizard Steps

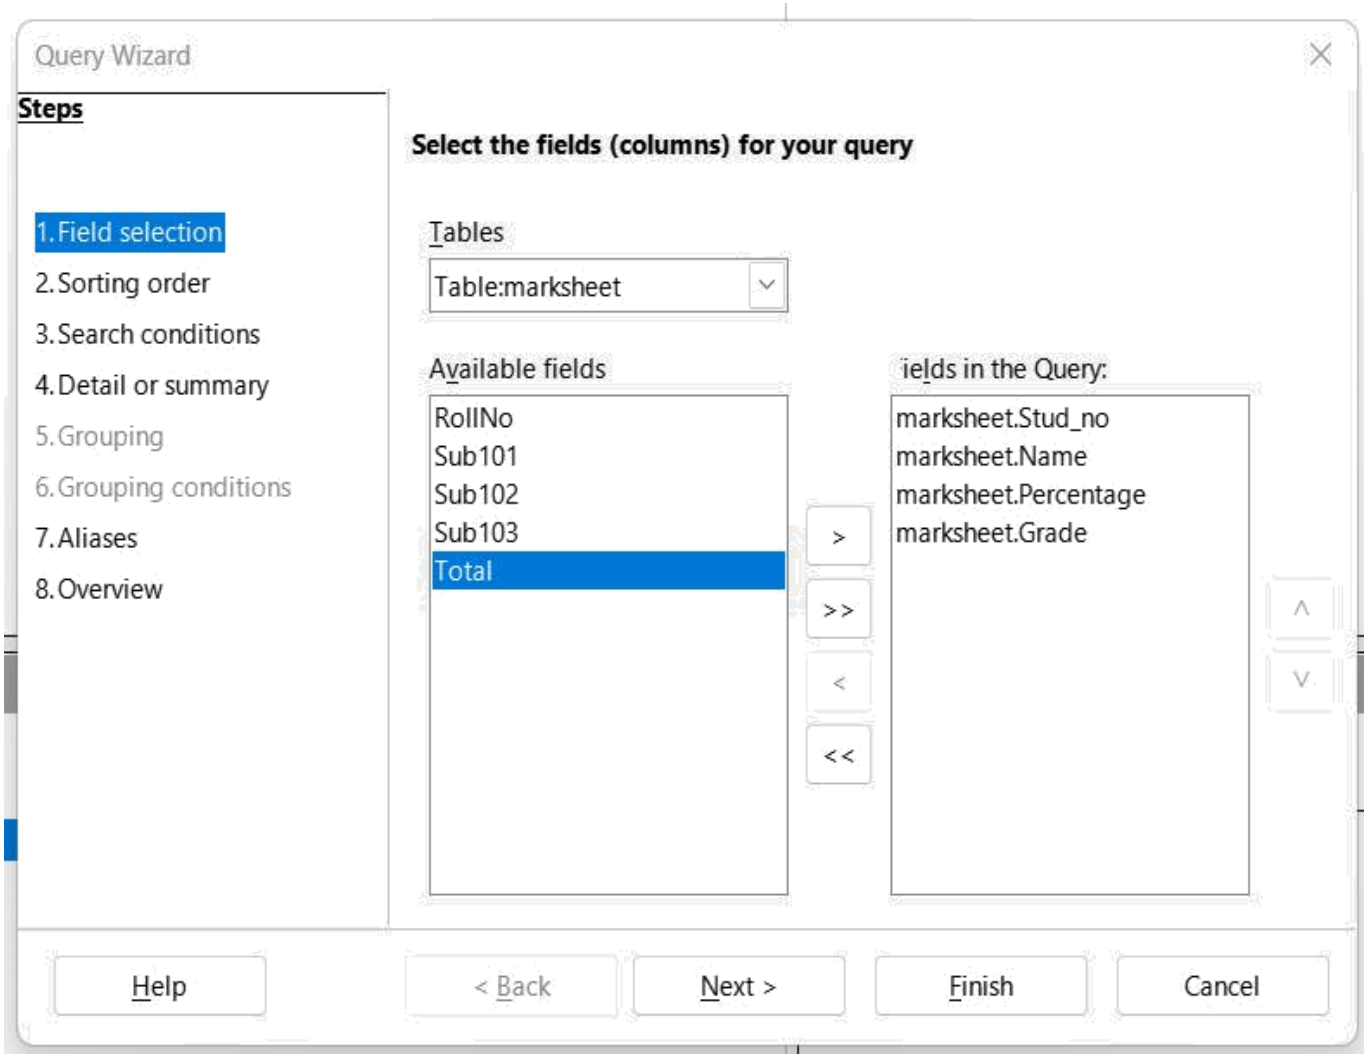

1. Click on Queries → Use Wizard to Create Query…

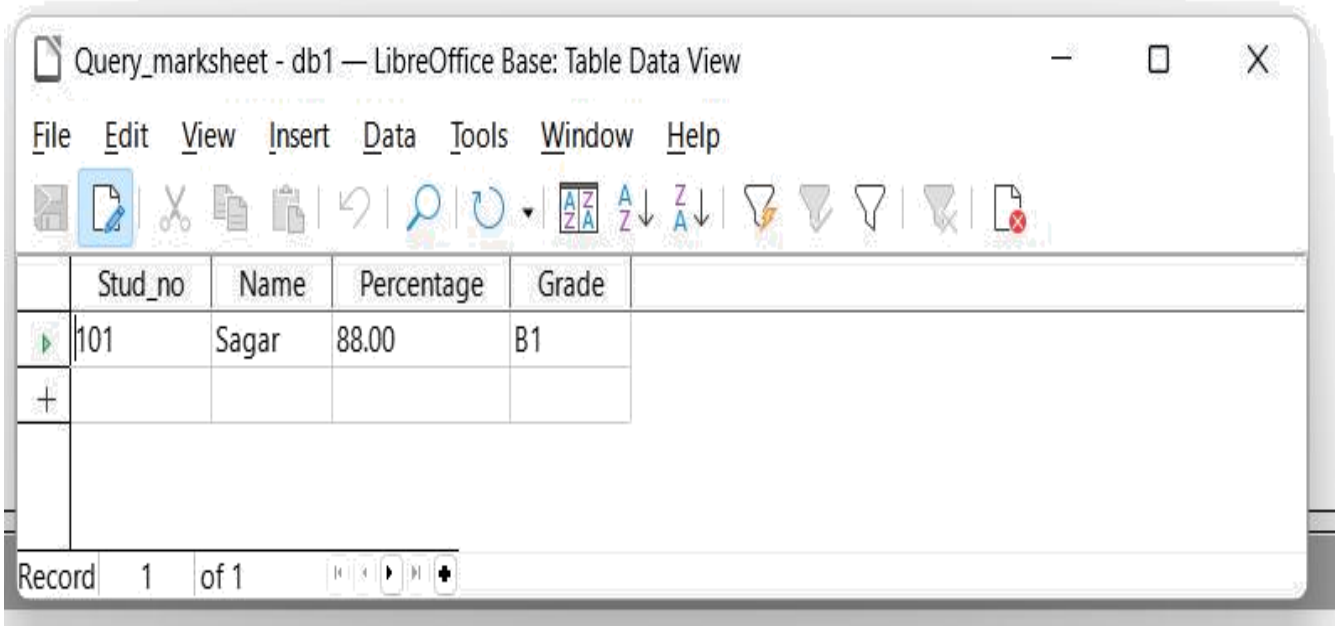

2. Query Wizard opens.

3. Select the table marksheet and select the fields given the question.

4. Click on finish.

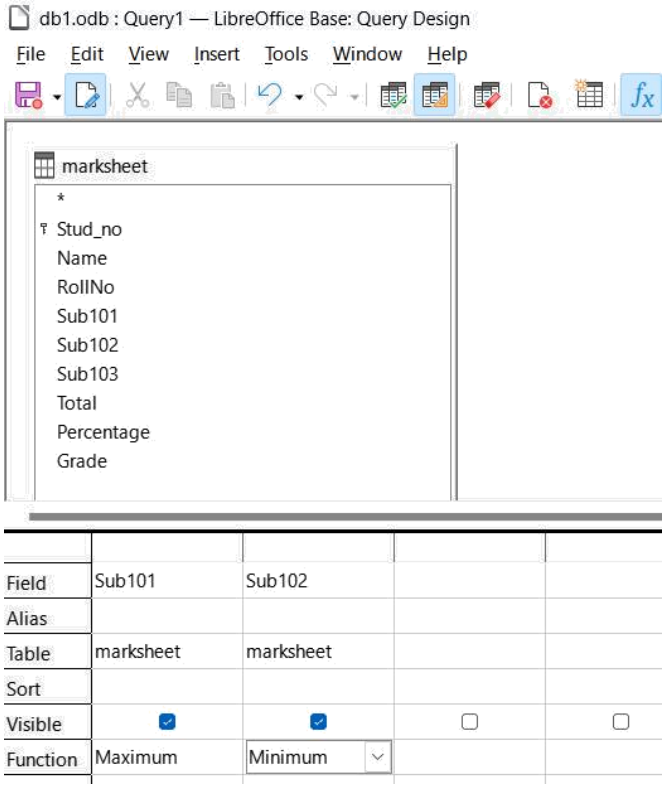

Design View

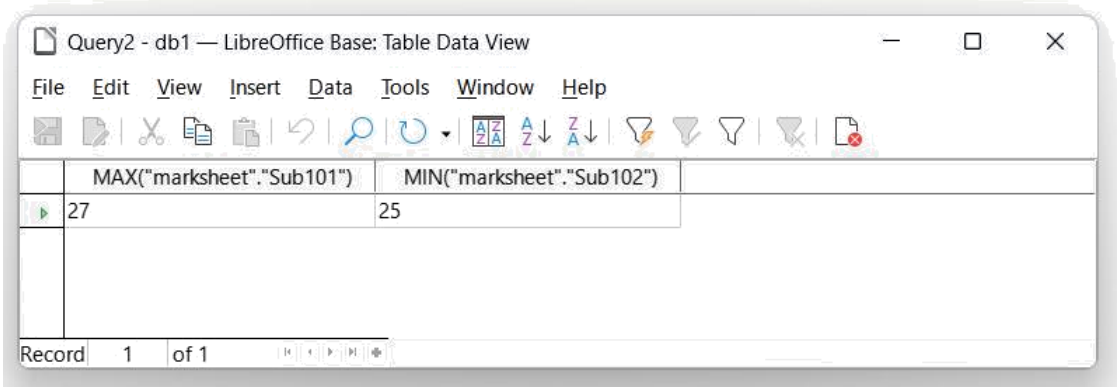

→ Display maximum marks and minimum marks for the fields given in the question, using design view.

1. Click Queries → Create Query in Design View….
2. The query design window will open.
3. Select the marksheet table and click on Add button.
4. Now select the field Sub101 and Sub102.
5. Choose the function maximum under Sub101 and Minimum under Sub102.
6. Save the query and check the result.

Query Design:

Output:

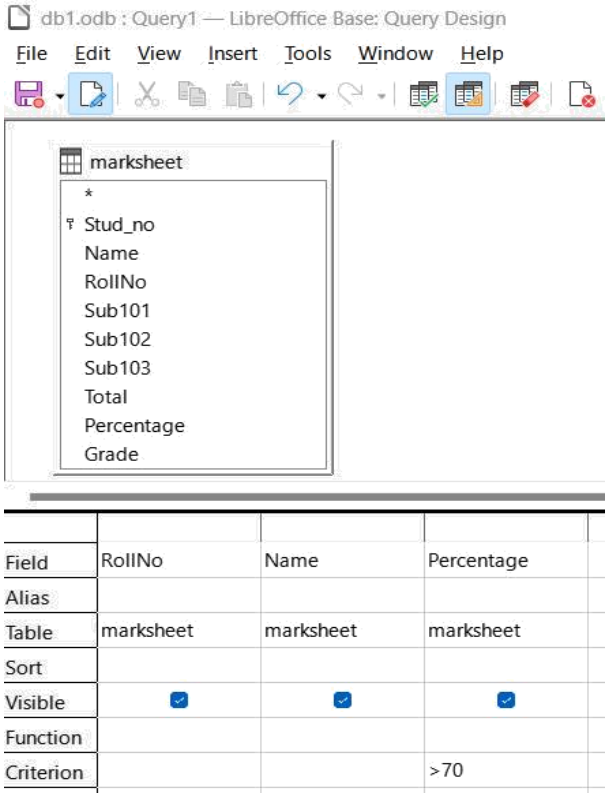

Assignment 3 (Query using criterion and sorting)

Objective: Query using criterion and sorting

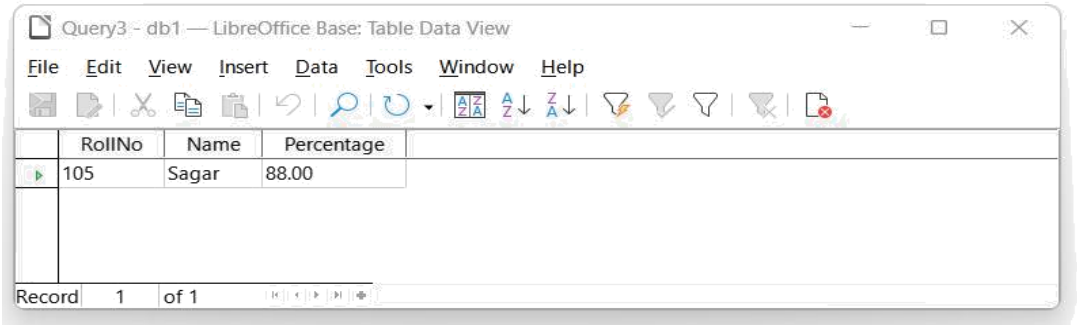

Task: Display the rollno, name and percentage whose percentage are more than 70 using design view

1. Click Queries → Create Query in Design View….
2. The query design window will open.
3. Select the marksheet table and click on Add button.
4. Select columns given in the question i.e. Rollno, Name and Percentage.
5. Type >70 in the front of criterion under the percentage field.
6. Save the query and check the result.

Query Design:

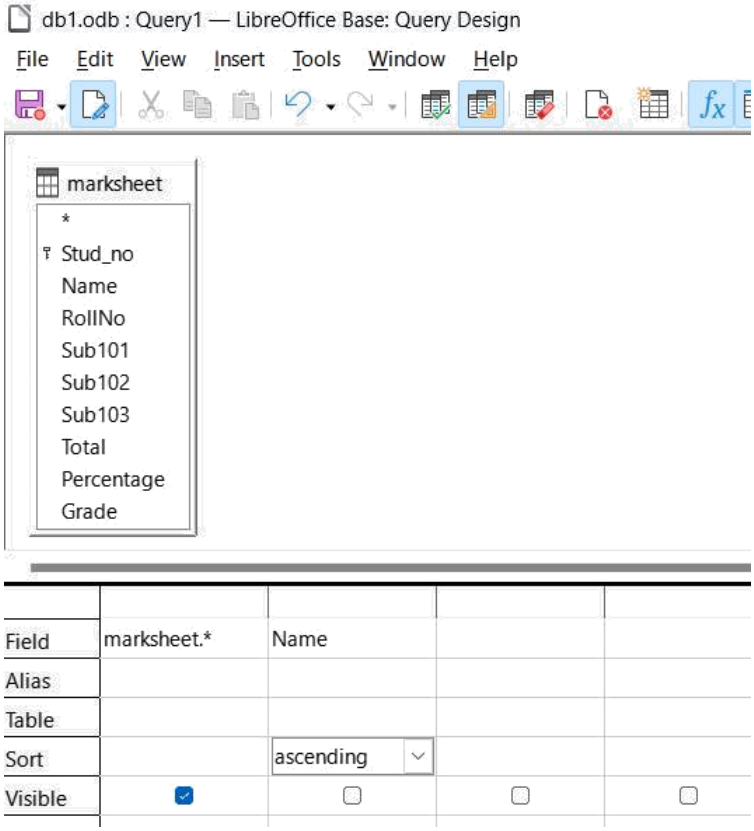

Output:

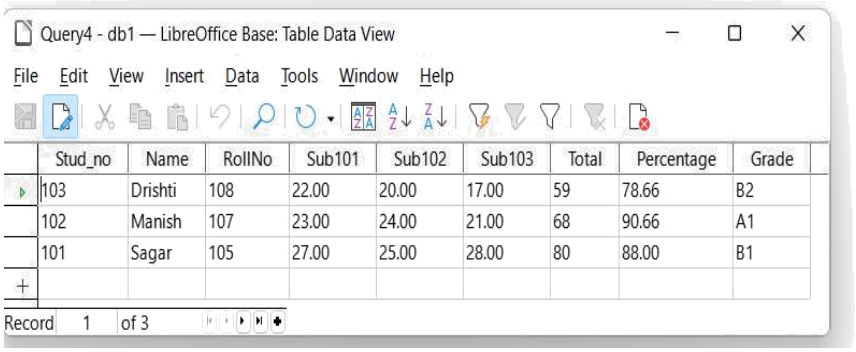

→ Display all the record in ascending order of names using design view.

1. Click Queries → Create Query in Design View….
2. The query design window will open.
3. Select the marksheet table and click on Add button.
4. Select marksheet and name in the column list.
5. Select sort → ascending under name field.
6. Now click on Visible checkbox to hide the name column in result.
7. Save the query and check the result.

Query Design View

Output:

Learning Outcome – Create Forms and Reports using wizard

Assignment 4

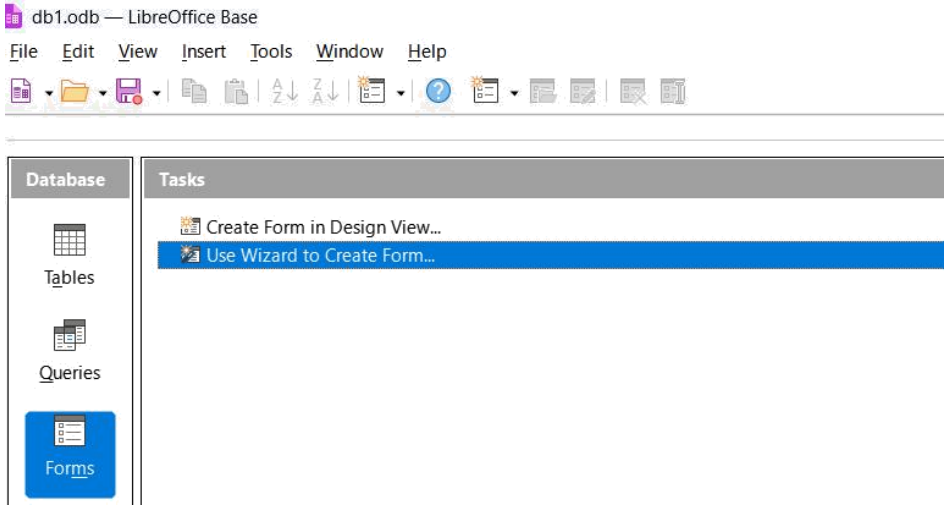

Objective: Creating form using wizard

Task: Create table a form using wizard by selecting all the fields for the table - Marksheet

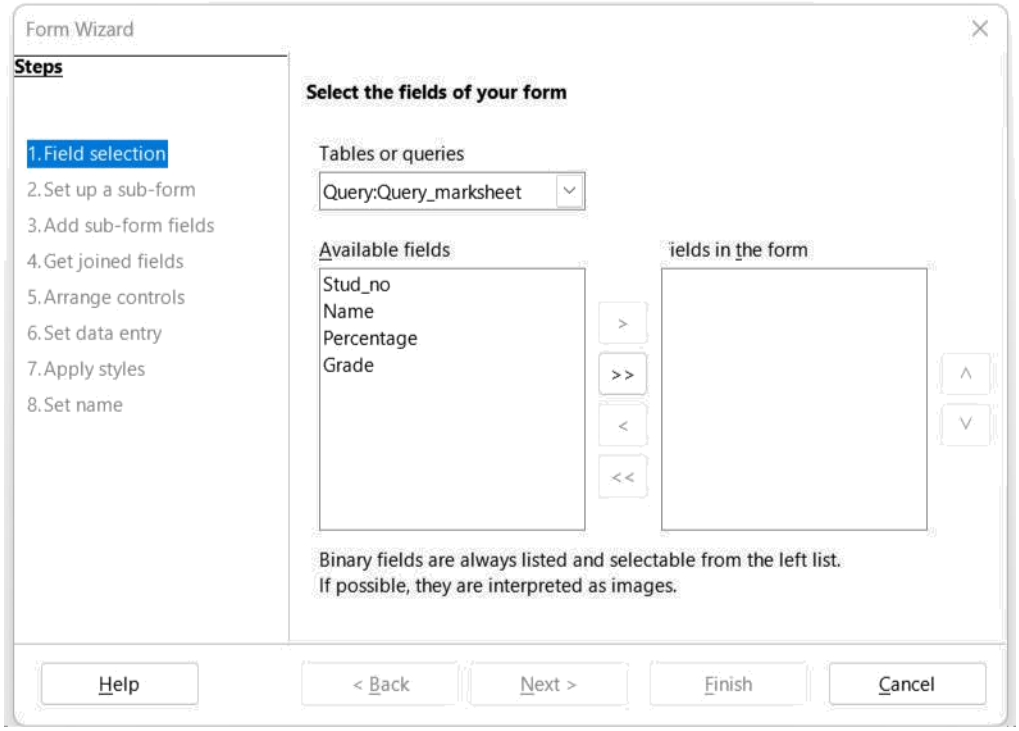

Solution

Steps to create a form using wizard

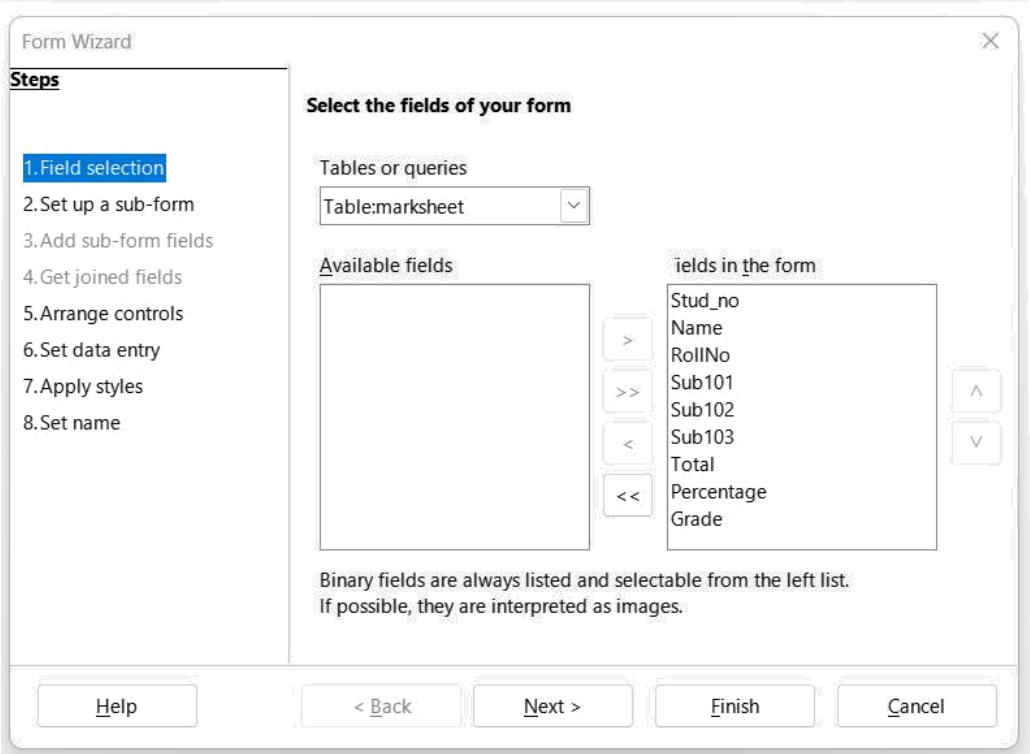

1. Click on Forms → Use Wizard to Create Form…

2. A Form Wizard appears.

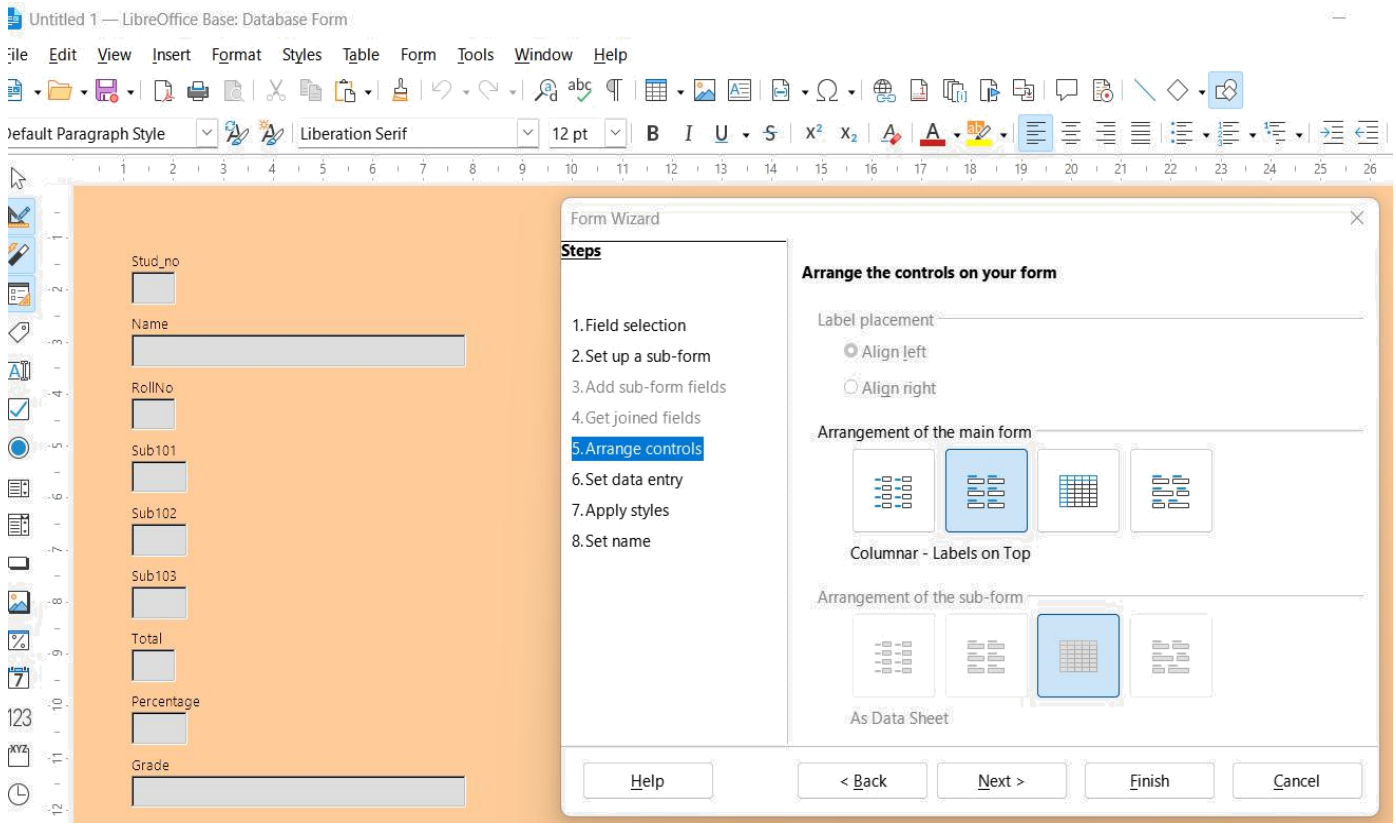

3. Select the table from Tables or Queries then add all the fields.

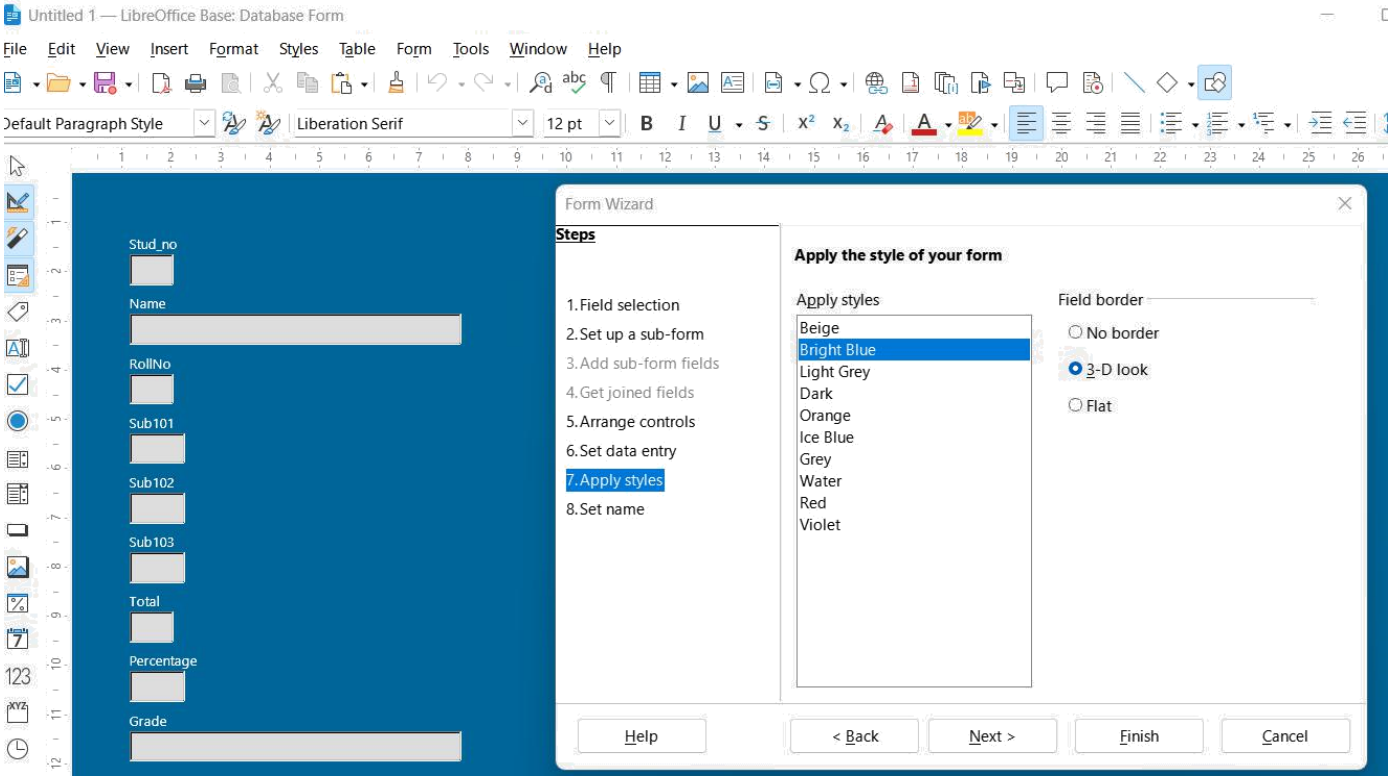

4. Click on Next button. Ignore step 3 and step 4 from wizard.

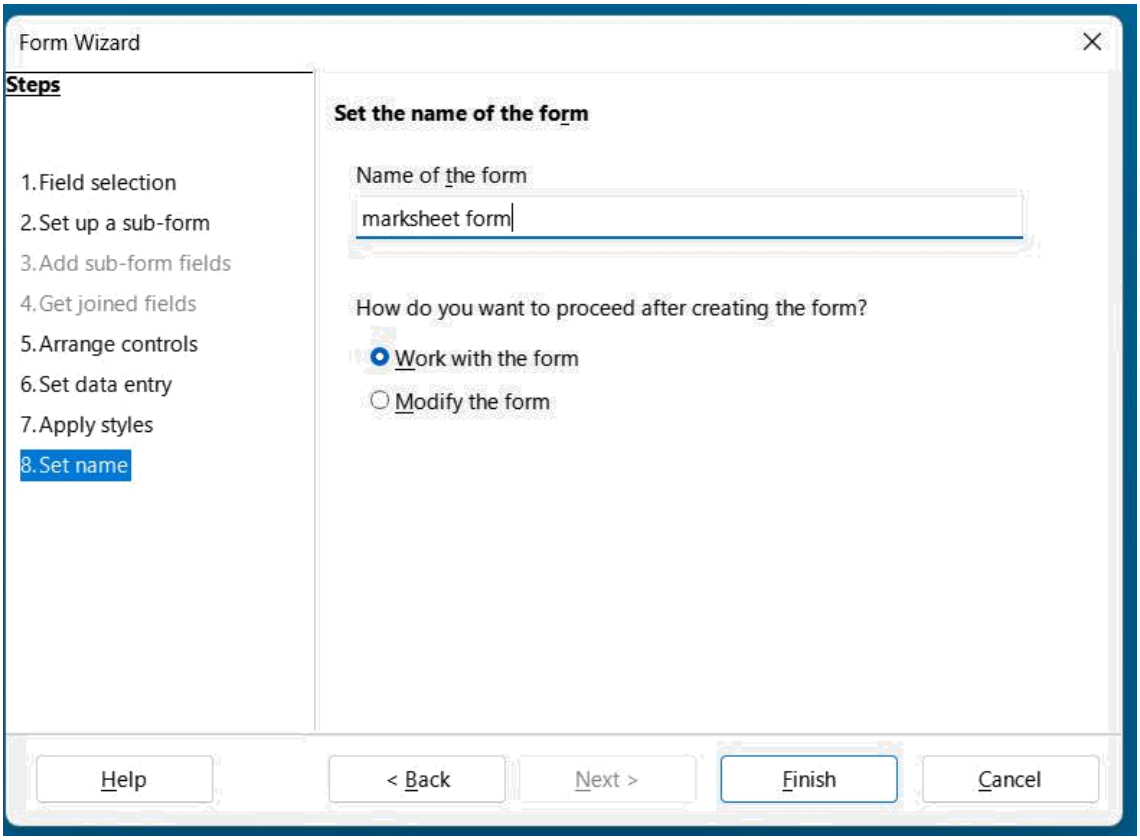

5. Select the first option i.e. Columnar – Labels Left then click on the next button.

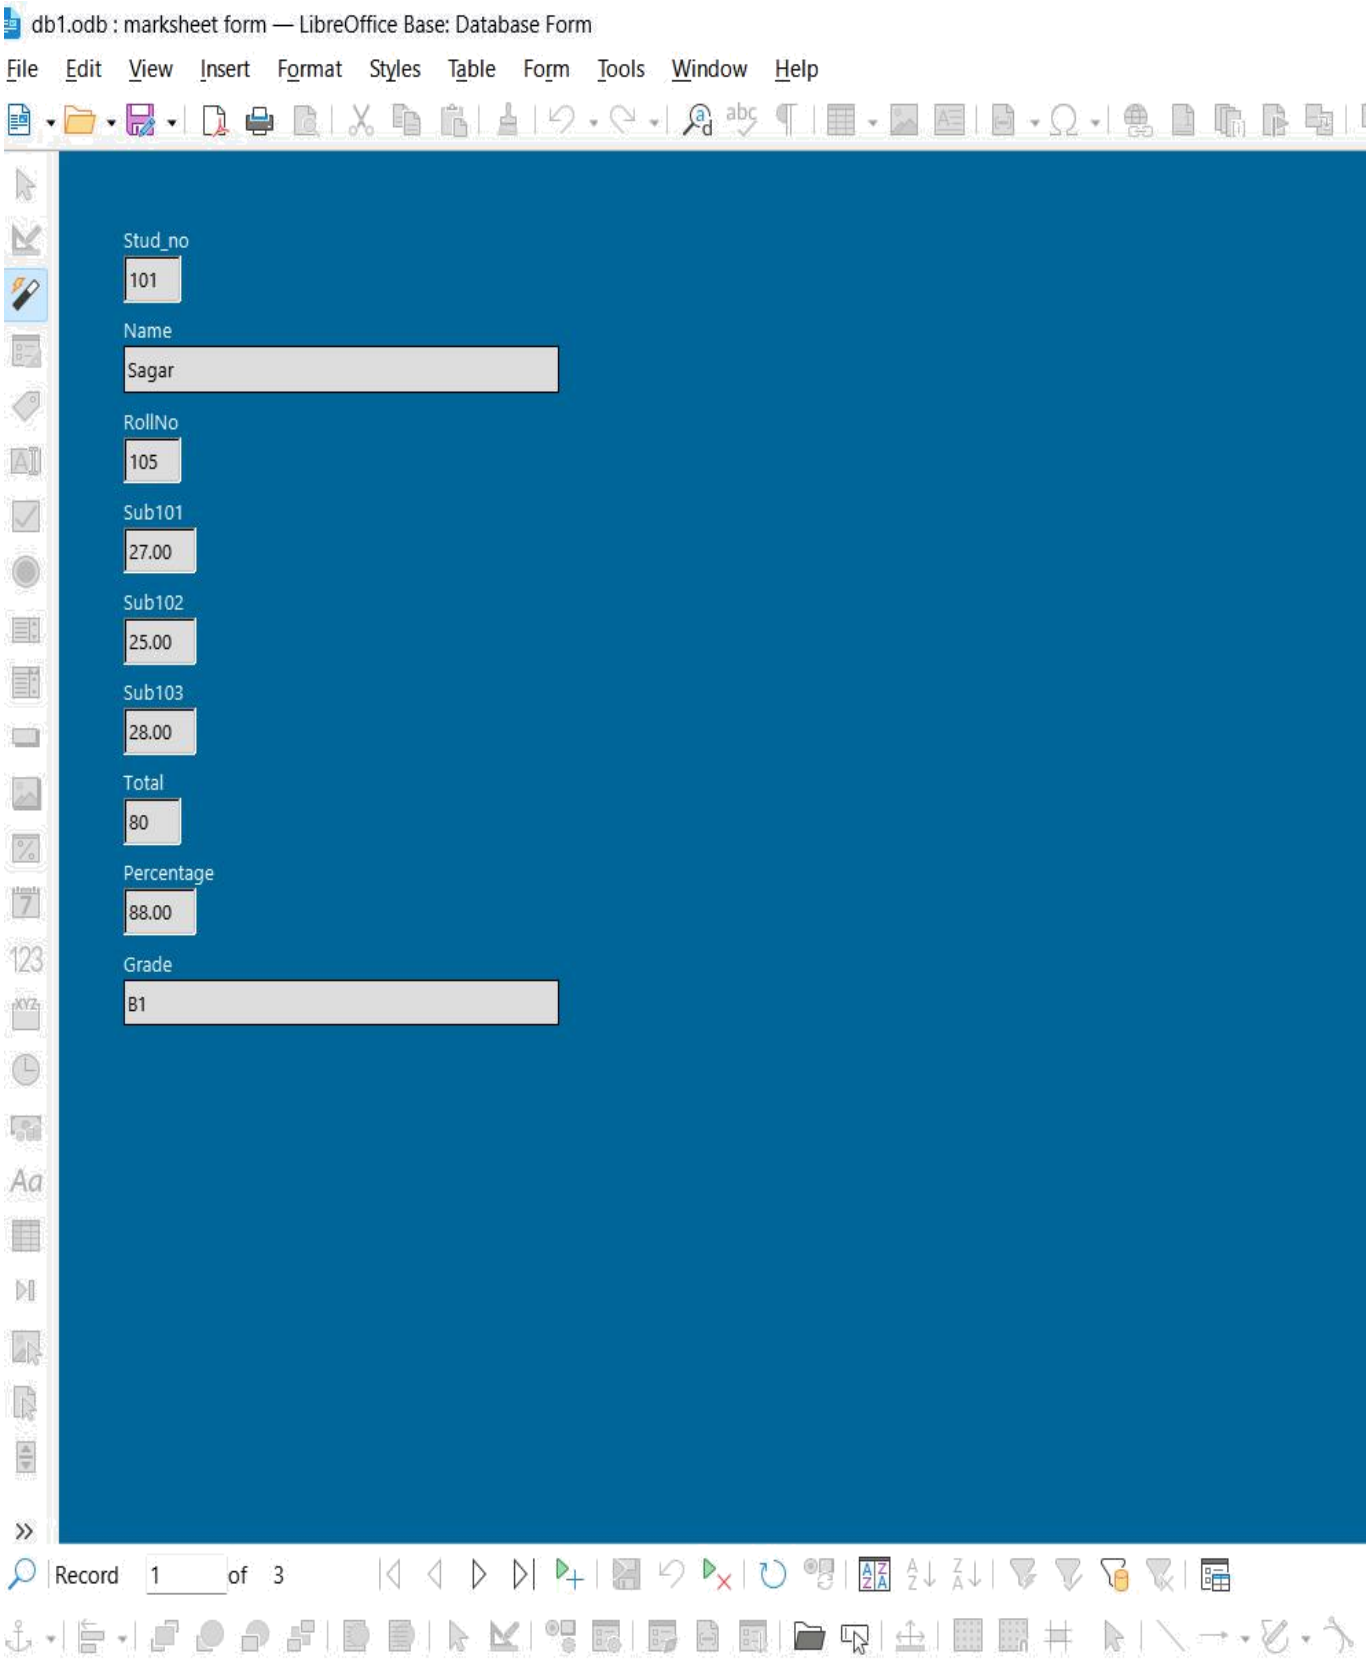

6. Now set data entry step will be there. Ignore this step and click on Next. Choose the styles for the form interface and click on next.

7. Type new name for the form and click on work with the form. Click on Finish

Form Output:

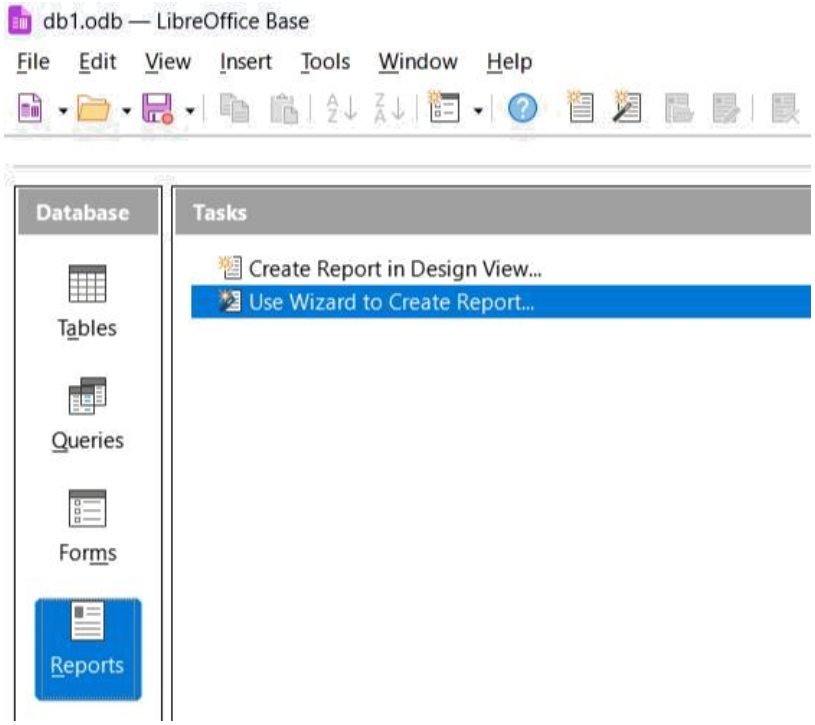

db1.odb : marksheet form — LibreOffice Base: Database Form
File Edit View Insert Format Styles Table Form Tools Window Help
Stud_no
101
Name
Sagar
RollNo
105
Sub101
27.00
Sub102
25.00
Sub103
28.00
Total
80
Percentage
88.00
Grade
B1
Record 1 of 3

Assignment 5

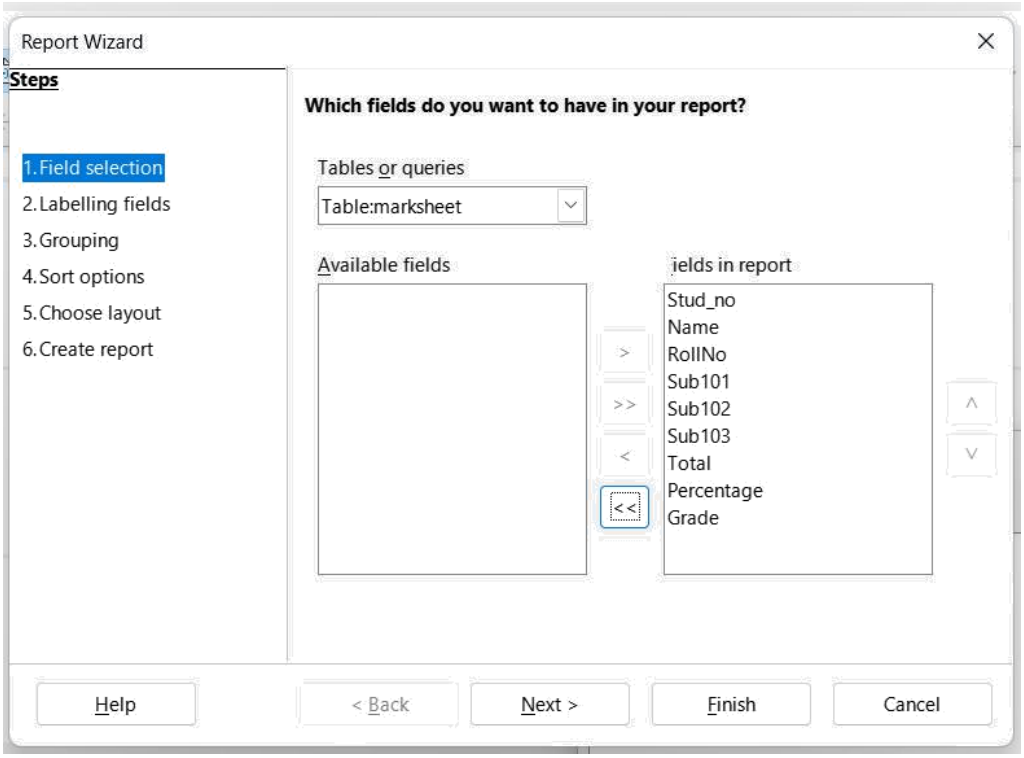

Objective: Creating report using wizard
Task: Create table a report using wizard by selecting all the fields for the table - Marksheet

Solution

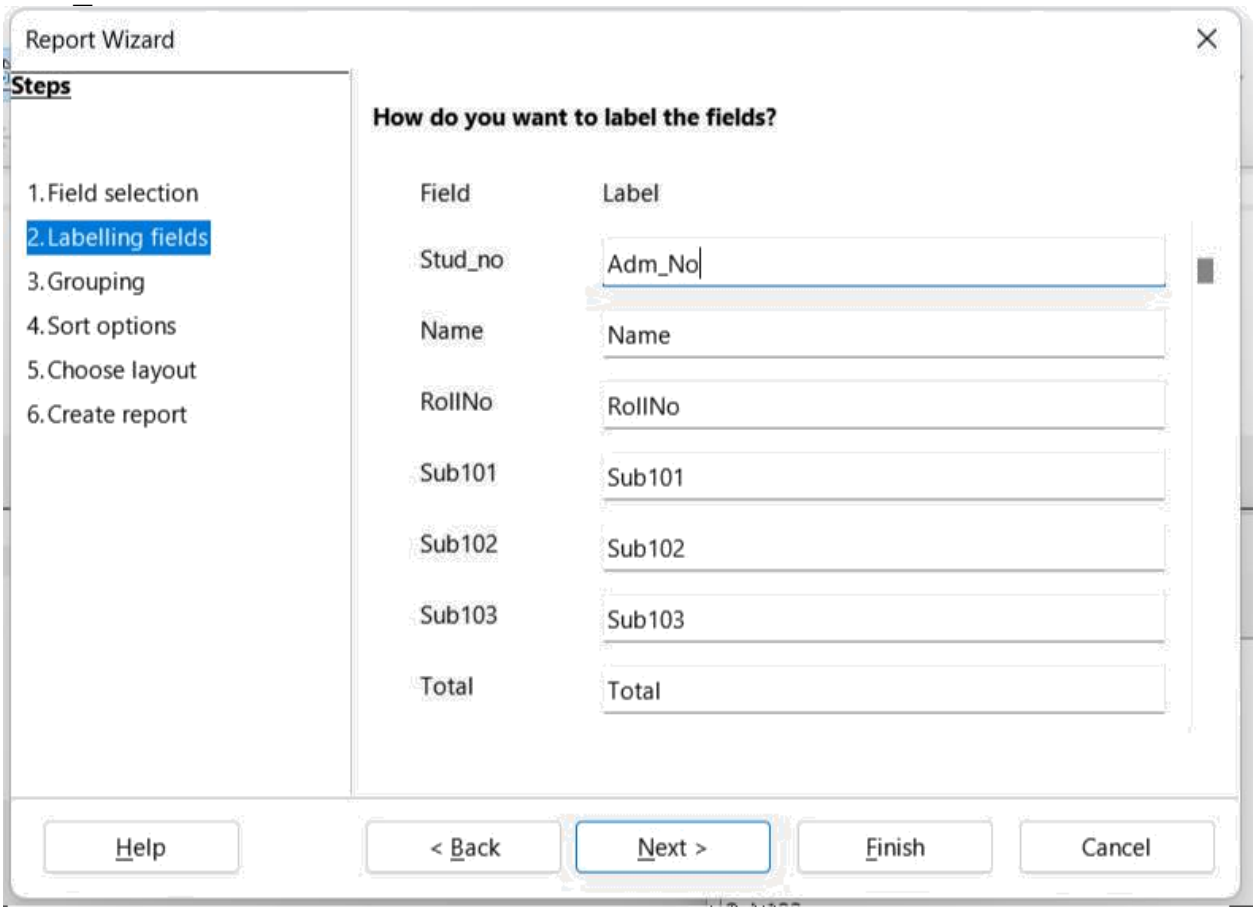

1. Click on Reports → Use Wizard to Create report. The report wizard will open in the new window.

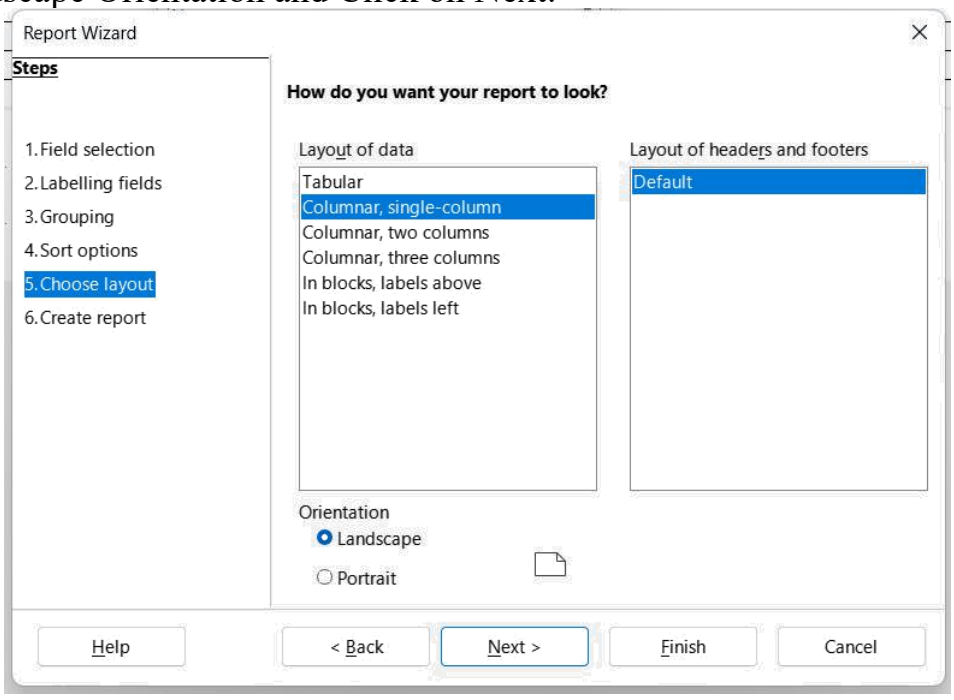

2. Select the table and add fields.

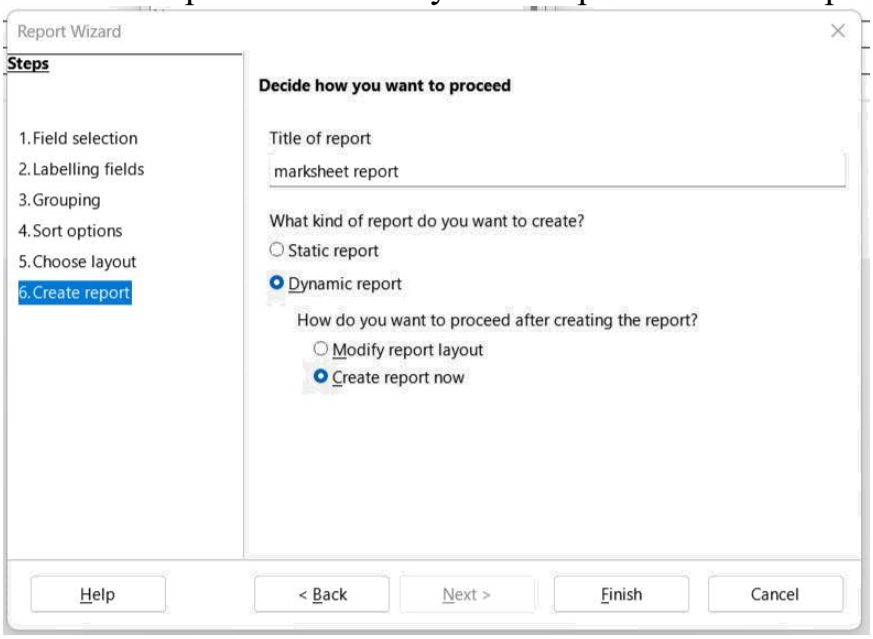

3. Now change the label text that you want in the report. I have changed the label Stud_no into Adm. No. Click on Next.

4. I have skipped groping and sorting options by click on Next button.
5. Now choose the layout. I have selected Columnar, Single Column as Layout of Data, Landscape Orientation and Click on Next.

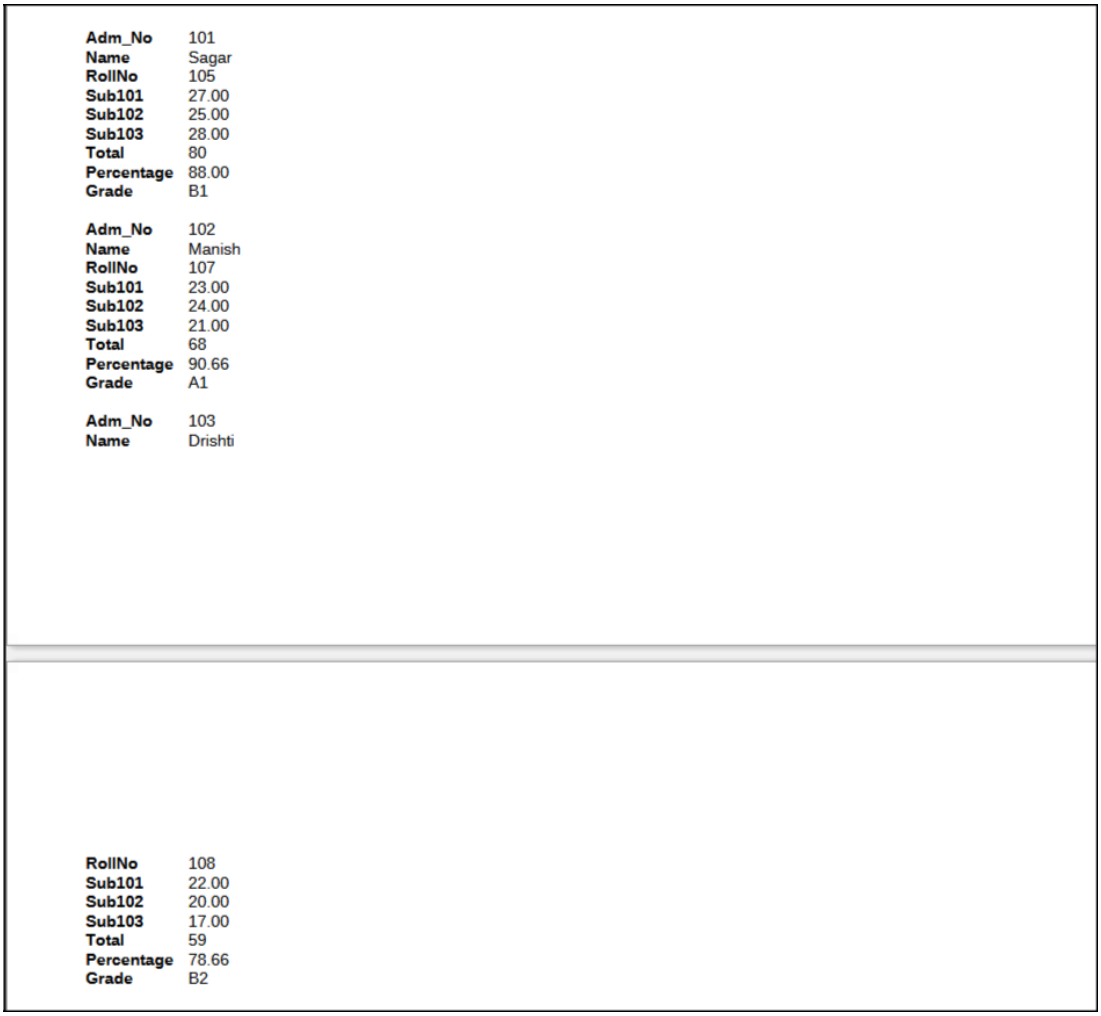

6. Now type the title of the report and select dynamic report → Create report now option.

7. Now click on finish.

Output:

Adm_No	101
Name	Sagar
RollNo	105
Sub101	27.00
Sub102	25.00
Sub103	28.00
